

(1) Social media addiction is one of the common negative effects of social media on youth. The reason is that youngsters give more than six hours a day to screentime. ~~We~~ They live in the times where mobile phones and social media have become their closest friends. So, they usually neglect how technology hurts them in so many ways. Almost 27% of children have symptoms of poor mental health due to the excessive usage of social media. Hence, social media addiction can have various negative effects on youth.

(2) Climate change is the result of population growth. Because the addition of every new person escalates the risk of increase in carbon emissions. Rich people of a country contribute in this factor more than that of the poor people. A survey has reported that each billionaire was responsible for the annual CO₂ emission of about ~~three~~ 3 billion metric tons. Thus, one of the multiple reasons of climate change is population growth.

(3) Declining dollar reserves result in the unstable economy of Pakistan.

As Pakistani currency is dependent on dollars, the decline in the dollar reserves leads to the devaluation of PKR. Moreover, many international investors left the country which resulted in trade deficit. Hence, the declining dollar reserves and trade deficit have caused troubles for the economy.

(4) Pakistani culture is very vast in its nature. Because it comprises different languages, cuisines, dressing styles, traditions etc. The norms and values vary significantly in different regions and provinces of the country. For example, Punjabis speak Punjabi, Sindhis speak Sindhi, Balochis speak Balochi and Pashtuns speak Pashto. Similarly, there are differences in other values as well. ~~there are~~ So, there is a variety of cultures across all the areas of Pakistan.
