

Para 1

Delusion of perfectionism is an adverse effect of social media. It compels people to weigh up their lives with rest of the world. Influencers showcase their lifestyles which constructs ideal impressions over the audience. While in reality they flaunt only the good chunks to attract people. As they say, "All that glitters is not gold." Their presumption of an ideal life cultivates inferiority complex among the viewers. Recent researches show high levels of anxiety due to the use of social media. Hence social media forms misconceptions regarding a perfect life.

Para 2

Cosmetic industry is one of the booming businesses in the world. The rise of the actual cosmetic industry took off at the ~~start~~ start of 20th century. However, the tipping point of the industry was in the last few decades. Now a days makeup ~~has~~ has become an essential for everyday life. Statistics shows that about 38% of women poll indicates that makeup gives them confidence boost and makes them feel attractive. Consequently there are some severe consequences as well. There is a hike in the number of women with body dissatisfaction and body image issues. In 2020,

USA registered the highest number of cosmetic procedures world wide, with nearly four million such operations. Hence pointing out the massive spread of cosmetic Industry.

Para: 3

Pakistan is facing the devastating effects of climate change. It is among top 20 countries in the world who are at high risks of climate change. Undoubtedly the risks not only include the rising temperature or the melting of glaciers but it will also contribute in migration, food and security issues which will eventually lead to regional, national and political issue. Himalays, the third most snow covered area which is located in the north of Pakistan, with climate change it may become a cause of Glacial ~~Outburst~~ Lake Outburst floods (GLOF) and ~~even~~ can destroy villages. The government of Pakistan should increase their response rate by early warning systems. Otherwise Pakistan will be a major target of climate change.
