

Title :- Power of earthquake.

An enemy beneath our feet but he cannot recognize national boundaries and political parties. Power of earthquake is greater than man produce by him self. When earth quick starts, the world trembles. But scientists are great solution combating earth quakes. If it strikes damages gas line and explosions are started. Lisbon capital of portugal almost 450 people's killed. but earthquake of Alaska only few people were killed this was one of most powerful quake in world. Geologist estimate whole of state moved over 80 feet west into Pacific ocean. This is only power to move entire subcontinent. Scientists work on it where earthquake will strike at least some measures than be taken to save our lives.
