Paragraph

(1) Economy of Pakistan

Economy of Pakistan is becoming worst day by day. The reason is poor governance and low productivity per capita. Pakistan's currency, the rupee, recently dropped to new lows against US dollar after authorities eased currency controls to meet one of the IMF's lending conditions. In April 2023, almost all of the country's 30 mobile phone assembly units, including three run by foreign brands, have shut down. This puts the economy of Pakistan in worst condition.

2) Muslims of Pakistan

Muslims of Pakistan are quite different from other muslim countries. The reason is raging lynch mobs are common

in Pakistan but unusual in other Muslim countries. The purist fantasy of a religious state as Imran khan's Riyasdt -i- Madina is very much alive in Pakistan while in other countries like Prince Muhammad Bin suleman in Saudi Arabia has pledged to transform this kingdom into an open society. According to 2006 Pew Global survey, the percentage of Pakistanis who saw bin Ladin as a world leader grew from 45percent in 2003 to 51pc in 2005. Hence, this beliefs has made Pakistani muslims unique from other's.

3) Kashmir conflict

Kashmir conflict is a territorial conflict primarily between India and Pakistan It is started after the partition of India in 1947 as both countries claimed it their own territorial region. It is a dispute over the region that resulted into three wars till now. India controls

approximately 55% of the land area while Pakistan controls 30% of the land area and China controls the remaining 15%. of the land area. Hence, kashmir conflict is a major territorial region conflict between Pakistan and India.

4) **AI**

Artificial intelligence (AI) is the field of science concerned with the study and design of intelligent machines. As it mainly focuses on understanding and performing intelligent tasks such as reasoning, learning new skills, and adopting to new situations and problems. It is basically the development of intelligent systems that can work and reach similar to human beings. For example, chatgpt-4 is a modern example of AI. Hence, AI is an intelligent machine in the field of science

ai is not a machine

basic grammar and sentence structure is satisfactory
