Subheading: Negative Effects of Social Media on Youth

I. Topic

The use of social media has many negative effects on young people and one of them is Distraction while driving.

Sentence:

II. Explanatory

Distraction is a specific type of inattention that occurs when drivers divert their attention away from the driving task to focus on another activity instead.

Sentence:

III. Supporting point:

Distraction negatively affects driving performance for all drivers but can be especially dangerous for young, inexperienced drivers. In case of Where they can fatally hurt themselves as well as other people on road.

IV. Example

Evidence

One notable case of how social media claimed the life of its user was the fatal car crash in Pennsylvania in 2016 that involved an 18-year-old girl. The young driver was reportedly streaming live on Facebook while driving along a highway in Pennsylvania when a tractor-trailer rear-ended her car killing her and a passenger.

V. Concluding

Sentence:

Thus, distracted driving which ultimately leads to fatalities is definitely linked to the use of social media while driving.
