"Over-eating"

this contradicts
the theme of the
passage

Over-eating is unsound practice
for rich people. They could save more
food and can improve their health.

They take dinner shortly before going
to bed; it must be avoided. The dinner
should be light and should be taken
~~3-4~~ hours before sleeping; so, it could
be digested properly. This prevents
prevent over-eating. Similarly it can
decrease the cost of food.
