Assignment: English Essay
Topic: Thesis Statement (T.S)

Topic #1 Knowledge implies responsibility

The idea of being responsible based
on knowledge is a belief which is
pragmatically justified. Knowledge of things places
another weight ^{Of responsibility} over one's shoulders. Knowledge
opens one's eyes to things previously unseen,
their ears to ideas unheard before, and this
is great

T.S is ok but can be made a lot better by rephrasing

Topic #2 Has Employment increased or decreased
in the Cyber Age

We live in an era where the dependency
on technology has become inevitable. Technology
reduced human intervention in many mechanical
and technical jobs that now can be
done in less time with more output.

There is no direct hint in t.s. Whether it supports increase or decrease in employment.
