

## Growth in Urbanization

Population of urban areas are rapidly growing. People are shifting towards cities due to facilities and provision of opportunities. In urban areas, people can give healthy environment and educational environment to their children. Hence, almost 60% of global population have shifted towards urban area. Moreover, another reason of rise in urban population is availability of resources and job opportunities. It encourages youth and un-employed people to transfer in urban areas. According to recent census report of Pakistan ~~Pakistan~~ almost ~~2.6%~~<sup>2.6%</sup> population rate have increased in cities or urban areas. Hence it is responsibility of government to ~~control~~ control on urban population and provide facilities in rural areas.
