Danish Nadeem #331

Jinnah's Pakistan and Now

On the 14th August 2023, Pakistan completes its 76 year of independence and celebrates the half century implementation of its constitution. On this day it is an utmost need to assess the present through the lens of Muhammad Ali Jinnah's vision for his nation. He was uncanny lucidity about the matter of state. He said that the right of dispensation and their policies rests with the electorate. In a 1948 while addressing to the army officers, Quaid-Azaman Muhammad Ali Jinnah said ~~that~~ that executive authority held only the head of government. The orders and commands that may come to you can't come without the sanctions of head of the government. Founding fathers of Pakistan on 11 August 1947 set out principles to the constituent assembly, inclusiveness, impartial governance, rule of law, social welfare and religious liberty. They imagined a state in which everyone thrived in harmony and absolute justice with the civilian supremacy.

But the present is completely divergent from their beliefs. This day beg a question that is jinnah's Pakistan an ideal fading into a myth. Pakistani people are equally responsible for such wounds and delmmas.

Title: *Plz also remark about intro, and give suggestion?*

Role of Energetic mind in Daily life.

Energetic mental attitude enhances daily life activities. This will lead to develop high morale that impress people. The right mental attitude will help to complete task without any error. However, ~~the~~ man's fresh mind makes his day happy and vice versa. This will also produce ~~an~~ optimistic and creates firm faith on eternal god. When a man ~~finds~~ thinks with positive mind then the ideas easily execute and prove useful.

Translation (2022)

Every era brings such matter with itself which are not liked by someone but to accept them. Sometimes, nature tests us by bringing something before us which is not like nor have connection with it still make it part of life. Today also going on. Every century bringing such changes with itself which are absolutely new as compare to earlier. The development of natural sciences and art gives many thing that can be considered as wastes of scientific and economic process. The nature gives us fruit along with binds us to dispose off of its fruit properly. If did not do that the environment pollution increase
