Sub-heading	Nuclear Challenge to world peace during the 21 st century
Topic Sentence	There are many challenges to world peace in the 21 st century, primarily the lack of enforcement of International treaties.
Explanatory/ Reasoning Sentence.	All pacts and agreements regarding the Non-Proliferation of Nuclear technology is made on the notion that the agreeing parties will hold their end of the deal.
Supporting Point.	Should a country withdraw from a treaty, like North Korea's withdrawal from the Treaty of the Non Proliferation of Nuclear weapons (NPT's); there is nothing the rest of the signatories can do except impose sanctions, which willful countries will endure in order to push their national interest.
Example	According to the IAEA's Director General; North Korea has performed two nuclear tests and continues to launch missiles and threaten other countries (IAEA, Director General Yukiya Amano, iaea.org , 2017), despite heavy sanctions.
Conclusion.	Unless there is legal consequences that can be implemented; pacts like NPT's will be carried out with a grain of salt.
