

Despite its urgency, climate crisis remains the most neglected cause

## Outline

### 1. Introduction

**Thesis statement:** The escalating implications of climate crisis and global ignorance is an alarming indicator. Silence at ends of big pollution emitter's is adding fuel to fire. However, it is need of the hour, to take pragmatic measures in order to mitigate the climate crisis.

### 2. Linking neglect of Climate change and its accelerating urgency

### 3. How is changing climate pattern an urgency?

- a. Decline in seasonal rainfalls:  
Increasing food insecurity
- b. Rising sea levels; Massive global migrations
- c. Escalating trends of cyclones:  
Threatening lives of many
- d. Climate crisis: Nightmare for third world countries
- e. Climate crisis: Increasing droughts and famine
- f. Declining agricultural production:  
Multiplying demand level
- g. Downward spiral of industrial Sector: Accelerating unemployment

#### 4. Why is climate crisis most neglected cause?

- a. Greed of global gains: Massive arms production and power divides
- b. Anarchic world structure: Accelerating weapons of mass destruction and pollution
- c. Global might: Serving as a big pollution emitter's
- d. Plea of third world countries: unheard by global mighty powers
- e. Prevailing climate change Skeptics: Climate change not a serious phenomena
- f. Developed countries: Prepared to deal with natural disasters caused due to climate change
- g. Big global carbon emitters: Least affected by climate change

#### 5. Wayforward: Mitigating Climate Crisis

#### 6. Conclusion
