C. Emphasizing on learning to come up with rapid development.

VIII Conclusion

(3)

Indeed, classrooms decide the future of a nation. A system which is based on critical thinking, innovation, active role of students in learning process, and production of skilled workforce. However, some factors are hindering in its way, lack of creativity, disparities in access to education and old method of teaching. Moreover, these challenges can be overcome with and classrooms decide the future of a nation.

Education plays a vital role in the development and building of a nation. It contributes to society in different ways; quality education produces critical minds who give output in science, arts, medicine, literature and other aspects of life. Sound education systems equip students with knowledge, critical thinking and to solve the problems; it enhances the creativity of students. Education plays a vital role of a bridge in economic and social mobility in the society. Further, classrooms give equal opportunity to all the masses which has positive implications on society; effective classroom management inculcates ethical values, civic sense in the behavior of the citizens; it provides such knowledge which is linked with national priorities and the need of the hours for the state; also prepares students to overcome the challenges of the modern world. To add more, education plays its role in countering extremism and radicalization in the society. Not only this, but also plays its role at the global level, countering different issues and protecting

④

state's interest abroad. However, this system is not also free from faultlines which can address through some policy measure, these are applying new methods of teaching, disparities in access to education. Last but not the least, emphasizing on learning of those knowledge and skills which are effective to meet the challenges of modern world.

This essay aims to explore the role of education and classroom management in shaping the future of a nation. ~~These~~ This also highlights the role of education in social, economical and global role of a nation in national and international level. The successive paragraphs discuss this in details.

It is very clear from the very beginning that quality education produces skilled work-force. This skilled work force contributes to society in different ways. Whenever there is skilled workforce within the states they contribute in different field of life including science, education, health, politics art and literature. Resultantly, this put its implication on the lives of the people where there is quality education, there is proper system of health for the citizens. When citizens are mentally and physically good they contribute both better than those who are not

(5)

equip with basic facilities. This quality education is not limited to health but also for politics, social life, art, and literature. Research shows that quality of education has overall impacts on the lives of citizens, therefore, it is clear that quality education plays its role in shaping a nation future.

Active and proper classroom management equip students with knowledge, creativity, critical thinking and problem solving. Critical thinking had played and playing its role in shaping nation's future, for instance those nations are successful who produces critical thinker through their classroom management. Because of critical thinking human introduces new ways of solving problems. For example in the past there were no health facilities pandemics killed millions of the people in the past but now it is possible to counter pandemics and epidemics. As Singapore, Germany and many other nations control the novel covid-19 through the help of vaccine. All these made possible by creativity and critical thinking,

Effective classroom fostering the ability of innovation and creativity. This provide an opportunities to think and produce something new to serve the nation. For instance it was Alexander who introduced penicillin ~~who~~ which saved

(6)

the lives of million of people who enjoyed a comfortable life. if, he did not think critical. This innovation was impossible and million of people lost their lives. Not only this but innovation also make life comfortable. For instance in the past people journey from one place to another place took month and years to reach their desired destiny. but now, it ~~were~~ make very affordable and faster because of helicopter and ~~an~~ airplanes. this is not only limited to this, innovation make life more comfortable with the ~~into~~ innovation of computer and the internet connection. Now, one can easily search whatever he/she needs through his system. All these made possible by innovation and creativity which is the product of effective classroom management. So, it is proved that innovation and creativity decide the future of a nation.

Effective classroom management not only plays its role in quality education and development of human capital which discuss above, but also contribute in social and economic mobility which has direct impacts on the future of a nation. The following paragraph discuss these in details.

⑦

Education uses as a means to bridge social gaps and reduce inequalities. Education plays a vital role in social and economic mobility within and among the nations. Those who acquired quality education has upward mobility in terms of education, access to quality food, health, and social facilities. On the otherhand Those who do not have access to quality education spent life miserably. Example of America can be put where majority of graduate earn more than those who only attain school. If this facility make available to all the masses of the state. The chances of social and economic mobility increases. Moreover, those nations are moving upward whose classroom produces skilled workforce and knowledgeable mind. who contributes to state and society and spend comfortable and peaceful life. The Scandinavian and A European states can be seen where as an example. where classroom produces such workforce who contributes positively. This also reduces inequality within the masses because everyone has chance to grow and play its role in development.

Classrooms provide equal opportunities to all the students regardless of their race, language, custom and colour. when everyone had an opportunity

(8)

he get the chance and do whatever he/she can do. Equal opportunities in health, job, education, art politics and other aspects of life gives ample of opportunities to the masses. who so, everyone take part whatever and whenever has/her talent fits. and contributes according to his/her ability. It enhances the interest of the masses to take part in different field of life. with this effective classroom gives skilled and workforce who plays their role in economic growth.

For economic growth skilled labour and educated workforce is very necessary. because every skilled worker does some contribute to economy. Example of many developed nation can be seen where quality education produces skilled workforce who plays their roles in education, health, politics, art and literature; also gives some new ways to generate money which contributes to economic growth. For example, China's quality education produces skilled workforce who generate new gadget and product. Resultantly, currently China is the world largest exporter of goods in directly contributes to

④

economic growth. Hence, it is proved that skilled worker contributes more to economic growth.

The above section discussed the role of effective classroom in social and economic mobility of a nation. Through different ways of effective classroom management one can reach to the peak of development in terms of social and economic mobility.

Different examples of world have been discussed in the above mentioned paragraph. The successive paragraphs deal that what is the relevance of curriculum in shaping the future of any nation.

Such a curriculum decides the future of a nation which is linked with the national priorities of any state. It means that state should design such curricula which can handle the issues of the nation. Policy maker should keep in mind the socio-economic and political needs of the states and design education policies; also keep in mind the changing circumstances. When curricula is based on social and economic reality of the state; it changes the future of the nation. Developed countries keep all these factors in mind and give such curricula which can address the

(10)

Challenges faced by a nation America, China, and many European countries are developing day by day because they prioritize such curriculum which is in line with their national priorities.

Another important element in setting curriculum is integrating of those practices which are applicable to word problems. Those nations are successful which devices such knowledge and skills which are helpful in solving the issues confronted by the state. In case a curriculum is device which could not give practical skills and real application to students, how they can solve the complex issues of modern world. Majority of world developed states introduced such curriculum which gives its students practical skills who through these skills contribute in different field of life.

With these those nations are successful who preparing their students for the demands of modern world challenges. Many nations are underdeveloped because of their curriculum which does not realize and solve the problem of modern world. Examples of some African states can be seen. On the other hand, those nations are successful who devices

(11)

such curriculum which can address the complex challenges of modern world. America, ~~and~~ China and many western countries equip their students with such knowledge which can easily solve their complex issue from health, politics, literature ~~and~~ to defence and foreign policies.

Classroom not only solve the domestic issues of a nation's but also plays its role at global level through diplomacy. A nation strength its diplomay through international exchange program, by which a nation learn and solve their issue from ~~the~~ with different world countries.

At global level states create sense of global citizens who contributes to the whole world despite one own nation. There are some complex and devastating issues which are not limited to a specific nation. such as climate change, and pandemics. if the state prepare such citizen who contributes to such devastating challenges, ~~through~~ the whole world protect and save from great danger of climate change and pandemics. Example of many vaccine donated countries can had seen during the novel corona pandemic of 2019. So, it is proved that effective classroom contributes at global level as well.

(12)

All the above mentioned are the implications of effective classroom management. With all these, effective classroom management faces some challenges which can be solved through effective management.

Effective classroom decide the future of a nation when there is accessibility to all the sectors of the society to it. Unfortunately, many sectors can not easily access to education, therefore, the future of a nation can not be decided by those small fraction of society who have access and other have not. Removing access disparities to access to education can solve this challenge.

Applying new teaching methodology can address the challenge. Critical pedagogy should be implement in classroom that it plays its role in shaping the behavior of a nation.

Last but not the least, emphasizing on learning to come up with the challenges which are confronted by the states in modern world.

In conclusion it can be said that education plays a vital role in shaping a nation's future. Quality education give critical mind

(13)

to society who plays their role in the development of a nation. Effective classroom create such an environment where creativity, innovation is boosting; also play important role in social and economic mobility of the nations. ~~It~~ also further, effective classroom inculcate civic values within ~~students~~ which is addressing the challenges of the modern world complex issues. ~~it~~ Moreover, effective classroom management easily eliminate extremism and radicalisation from the society. To add more, effective classroom not only solve the domestic issues but also concentrate it focus on global issues that protect humanity from the complex issues of the world.
