## Online Education has more Opportunities Than Challenges

Technological and digital revolutions are revolutionizing the world at fast pace. Unprecedented advancements are narrowing the room for laggards and broadening space for innovators. Online education is one shoot branch of technological revolution. The paradigm shift from traditional learning style to modern online mode of learning has been a result of Covid-19 pandemic. In pandemic times education was not stopped rather accelerated across borders. However, transformation is not an easy phenomena. It takes time to have recognition and acceptability among masses.

Furthermore, Online education has more opportunities than challenges. There are numerous challenges posed due to this transformation. The substantial among are; Lack of internet facility, as most nations are still struggling with internet and connectivity issues, despite living in age of revolution. Connectivity issues ~~pose~~ serve as barriers in effective transformation of lectures. Some students face concentration issues in virtual learning and others are sensitive to screens.

Despite challenges the opportunities of online education out number. The pros of online education ranging from social benefits, economic, political to technological. As it creates ease of learning. By <sup>with</sup> provision of equal access to all, learning has become easy. Further, it is time saving. It uplifts nations not just individuals. Saves the economic cost of educational budget. Spendings. Proven less costly on pockets of poor. Along with that also removes barrier of educational disparity. In addition, distance learning enabled to seek education on international standards. A bright chance for nations to learn from educational style of developed countries. Lastly, it also trains student digitally, digital and technological literacy is need of the hour.

In order to progress nations need to adopt online education in order to get potential benefit out of it. Nations like Pakistan are already lagging behind in multiple spheres. But there is always a silver lining in dark ~~and~~. This silver lining for Pakistan is adapting and utilizing online platforms for the propagation of education.
