According to Author, that there are many superstitions in different states and they are loved to study. Some assumptions, are looking at new moon is being unlucky and likewise many more. If they told a scientist about these assumption/figures. First of all they will ask for evidence and they would not believe on only one case they will ask for hundreds. ~~They~~ Apart from these believes or evidences any intelligent person can ask for the reason.

Why Dog howling is related to ^{and gifted} death and is there any powers to dogs or it is just an Assumption.

Words: 96

Title:

- Any Superstitions needs an Evidence/facts.
- Scientist would not believe on Superstitions without Reasons.
