- g) Lack of consensus among educationists on the safe use of AI in academia

4. Failure to use AI responsibly might lead to a disastrous future

- a) AI technology might get out of human control
- b) AI driven military technology can fall into wrong hands.
- c) It will be much harder to distinguish between real and fake news on media platforms
- d) AI could exacerbate socioeconomic divides leading to crime and conflicts.

5) How can mankind ensure responsible AI usage?

- a) Process of AI regulation must keep pace with AI advancement/innovation
- b) National and International AI regulations to be drafted on urgent basis.
- c) Disseminate education and skills in youth regarding safe and progressive AI-usage
- d) Regulation and control of gender-biased AI algorithms
- e) Encouraging the use of open-source algorithms among developers and users.

6) Conclusion

Topic :- Despite its urgency, climate crisis remains the most neglected cause.

Outline

1) Introduction

Thesis Statement

2) Crunch paragraph

3) A look at the urgency of climate crisis

- a) The Earth has entered a stage called "Global boiling"
- b) Climate crisis can decimate entire continents
- c) Every country is facing climate crisis with varying intensities

4) Factors that are making climate crisis a neglected cause

- a) Global North is busy playing the blame game amongst themselves
- b) Global South is heavily reliant on foreign aid (no funding — no climate action)
- c) Climate awareness and action pressure groups are being shutdown and treated like criminals
- d) Governments are not paying heed to the warnings of scientific community
- e) Some sociologists and economists still believe that climate crisis is a myth
- f) Politicians are unaware of the risks of climate crisis

g) International community is indulged in cosmetic solutions

h) Vested interests of multinational corporations (MNCs) and large businesses are a big hurdle in climate policy making

i) Lack of public awareness is a big hurdle in the effective implementation of remediation measures

j) Lack of continued efforts on part of world leaders and global community

5) Policy measures to mainstream the climate crisis

a) Public awareness is the foremost requirement to rally everyone into action

b) Global north needs to take the lead in climate action

c) World leaders and MNCs need to prioritize climate action on war footings

d) Print, electronic and social media platforms should end climate skepticism and highlight the urgency of climate crisis

c) Conclusion
