

## Economic Conditions in Pakistan

Pakistan is facing challenges to control ~~his~~ its economic position. During covid-19 people faced hard days in country and other reason that caused high inflation was war between Ukraine and Russia. It had not stopped there but another challenge was waiting for people of Pakistan and it was rains and floods that totally demaged ~~economic~~ <sup>economic</sup> policies of Pakistan. Currently Pakistan is facing 48% increase in Inflation. Government ought to bring new reforms to gain its lost economic stability. It will be possible when policies will be revised and non-profit policies and projects will be ended. Pakistan government will have to bring foreign investors in country. Secondly, government should increase its export and decrease its import. Moreover, strict policies can be made so that cash inflow and outflow controlled. It is hard to take all steps but government has no other options as it has become more difficult to take loan from world aid organizations.
