The rise of generative AI: Pros and Cons

Outline

1- Introduction: These statements - (The revolution of AI is rising.) Rise of generative AI has certain pros including, ^{improved} quality of education, better healthcare system, effective traffic management etc. Unfortunately, generative AI also has cons such as threat to human labour, makes man lazy, affects students' skill ^{development}, some steps be adopted to strengthen AI for better profits. results

redundant
self contradictory

2- The revolutionary use of generative AI

3- Pros of generative AI

- a) Betterment of education through multimedia ^{and graphics}
- b) Reformation in healthcare system by Robotic surgery
- c) Attractive and public favourable journalism by Chat-GPT → use more suitable adjectives
- d) Increase in industrial productivity or production?
- e) Effective management in traffic system through? by Robotic cars
- f) Robotic selection of seeds: Agricultural reform
- g) Saving human time by managing a huge burden of work

4- ^{Cons} Cons of generative AI AI

- a) Rise of AI leads to threat to human labour → clarify
- b) ^{Over} Dependency on AI makes human lazy
- c) No improvement in progress of AI?

- d) with experience of work → clarify
 Affects students' skills and techniques
- e) Risk of plausible gen journalism information
 of learning ?
- f) Replacement of humans in education, medical, agriculture sectors etc → so-?
- g) Threat to cyber space by use of Chat.
 GPT: an Italian narration → clarify

5- Suggestive ways to make AI secure and favorable

- a) Make human involvement necessary in operation of AI
- b) Strengthening of AI in educational activities to escape? students' skills → clarify
- c) Strengthening cyber space performance and security in AI
- d) Reducing risk? of glorius and plausible knowledge

6- Conclusion
