

ESSAY 2023

Online learning is not only convenient but often more effective than traditional classroom instruction.

1 - Introduction:

Virtual learning is gaining traction among students owing to its convenience. Although some still favour the traditional classroom instruction due to its distinct merits. However, flexible study hours, wide selection of programs and reduced cost of studies are some of the features which make online education more efficacious than conventional lecture room learning.

2 E-Learning; the future of education

A shift from traditional to virtual learning

Availability of internet and online learning tools

A surge in distance learning during pandemic

3 E-Learning; why is it convenient?

- i) Offers flexible study hours
- ii) Increased course variety and wide selection of programs
- iii) Repeated access to course material
- iv) A personalized mode of education
- v) Greater accessibility and inclusivity
- vi) Immediate feedback and evaluation
- vii) An interactive way of learning
- viii) Allows for more leisure time

4

The merits of Traditional Classroom Instruction

- i) Involves less distractions
- ii) Inculcates interpersonal skills
- iii) Offers co-curricular activities in addition to learning
- iv) Instills moral and disciplinary qualities
- v) Enhances student motivation
- vi) Poses lower health risks

what about convenience?

5 Why online learning is more effective than classroom learning

- i) Retention rates are higher with online learning
- ii) Helps maintain a healthy work-study balance
- iii) Reduced cost of learning
- iv) Greater career advancement opportunities
- v) Distance learning at world class universities

6

Conclusion

Content is relevant / pertinent and comprehensive

Structure and organization of outline: ideas must be presented in a logical sequence

Add hook

The concept of conventional education has radically transformed over the recent years. Being physically present in a classroom is not the only learning option anymore. Education is no longer limited to the confines of time and space as one can now have access to quality education as long as he or she is connected to the internet. Consequently, the world has entered into a new era — the revolution of e-learning. While some still remain skeptic in adapting to this new mode of instruction, many others find it to be an ^{effective} practical and convenient mode of learning as it fits their personal life and schedule. Apart from flexible study hours, another growing directive of virtual learning is that it provides greater inclusivity and accessibility to the students. The users can customize their learning experience, can choose from a wide variety of programs, have repeated access to course material and gain timely feedback and evaluations. Although the traditional education has its own merits such as lower distractions and development of interpersonal skills, it's the online learning which takes precedence over it in terms of efficacy and efficiency.
