

## Growth in Urbanization

Population of urban areas <sup>is</sup> rapidly growing. People are shifting towards cities due to facilities and provision of opportunities. In urban areas, people can give healthy environment and educational environment to their children. Hence, almost 60% of global population <sup>has</sup> shifted towards urban area. <sup>Moreover</sup>, another reason of rise in urban population is <sup>availability</sup> of resources and job opportunities. It encourages youth and un-employed people to transfer <sup>to</sup> in urban areas. According to recent census report of Pakistan ~~Pakistan~~ almost ~~2.6%~~ <sup>2.6%</sup> population rate have increased in cities or urban areas. Hence, it is <sup>the</sup> responsibility of government to ~~control~~ control ~~on~~ urban population and provide facilities in rural areas.

Avoid cutting.
