Aimen Criminology Q4 White a note | comprehensive note on the risk and protective factors Juvenile delinguency in Pakistan (2020) Introduction: Juvenile delinquency refers to The participation of minors, typically individuals below the age of 185 in itegal or deviant behaviour that violates societal norms and laws The word Juverile comes from the John word Juvenilis which means "young" or "youthful" The word Delinquency comes from the latin word Detinquere which means "away" or "to leave " / abandon so, when combined Juvenile Delinquency refers to the behaviour of young individuals who engage in illegal or deviant acts, often in violation of societal norms and law. According to Edwin H. Sutherland, the process whereby persons come to engage in the violation of legal norms through association with others who are already engaged in such violation whereas Travis Hirschi defines it as the failure of personal and Social controls to prevent a child or

adolescent from engaging in delinquent add Juvenile Delinquency: Risk and Protective Factors Children are the key to Pakistan's toture prosperity Today's children are tomorrow productive workers and engaged citizens. As per UNICEF report, 39%. of the Pakiston's population under 18 years the latest data Shows Palcistan having 80.4 Million children in 2017 Juvenile delinquency remains a pressing Social issue that affects nations across he globe Pakistan being no exception According to global data, juvenile delinquency rates vary across countries, influenced by cultural, social, and economic factors. As per UNODC report global overage for juvenile crime stood at 13.2 per 100,000 juveniles. Tuvenile delinguency has been a growing concern. In 2010 UNICEF report. Palciston focad increasing challenges in addressing the issue Several research studies have explored the complex web of factors contributing to Juvenile delingivency in Paluistain

Cultural Factors Social Factors Economic Factors Risk Factors: Toverty and Socio-Economic Disparities: (i) As per Robert K Merton's Strain theory, individuals experience strain when they are unable to achieve culturally approved goals using legitmate means in the context of poverty and socio-economic disparieties, young individuals facing economic hardships might feel fourtrated by their inability to access opportunities for success For instance, a teenager living in an economically disadvantaged area in Palcistan might face pressure to provide for their family due to financial struggles. With limited legitimate employment options, they recort to illegal activities like petty or drug dealing to meet their basic (ii) Family Dystunction and Parental Neglect:

According to Robert Burgess and Ronald Akers: Social learning theory individuals léarn behaviour through observation and imitation of others, particularly significant figures in their lives. It a family environment lacks positive role models and effective cliscipline, a young person may be more likely to engage in delinquent behavior. For instance a child growing up in a household with parental substance abuse and a domestic violence may internalize these behaviours, leading to a higher risk of violence and delinquency in their own life. iiii) Peex Influence: According to Ronald Akers Social Learning theory peex influence plays a Significant rate in shaping behavior, as adoleseents may model the behaviour of their delinquent peexs. For instance a teenager in Pakistan who associates with a group of friends involved in vandalism may become norse likely to engage in similar destructive acts due to the influence of their peers			
learn behaviour through observation and imitation of others, particularly significant figures in their lives. Re-		
(vi)	Lack of Education and Employment	Tr.
	Opportunities: Strain theory by Robert K. Mertons	y.
	Suggests that inadequate access to	
	education and employment opportunities	
	for instance financial stability, success.	
	and the means available to achieve	
	Them	
	For instance: a young person who	
	drops out of school due to financial constraints and has limited job prospects	
	out experience strain, leading them to	
	consider illegal activities to earn money.	17.5
	Drug and Substance Abuse:	
(N)	the factor can be understood through	
	Social learning theory as individuals might	
	learn drug and Substance abuse behaviors	
	by observing and imitating others, such	
	as family members, hiends, or media	
1.00	influences	
	For instance a teenager in Pakistan	
	might start using drugs after witnessing	
	Their older sibling using drugs as a coping	

mechanism for stress.	1550
Exposure to Violence and Trauma:	
Exposure to violence on a social	
lead individuals to internalize aggression	
behavious as a way to cope with or	
replicate their experiences social learning	
Sheary	
For instance a child who witnesses trequent	
instances of domestic violence at home	
may become desentized to violence, maigney	
If any more likely to use violent means	
to resolve conflicts outside of the home	
Involvement in Gangs:	
Gang involvement can be influenced	
learning as individual may	7.5%
Lat the values, norms and berranders	
al the going members they associate	
E included Ch techager in	
inio a gang to gain a serie	
laston and identity, our	
ight expose them to Grimina active	
They would not have engaged in otherwise.

		A
		Y
viii	Accessibility of Meapons:	
	As per cohen and Felson's Youtine	
	activities theory the presence of weapon	
	is relevant to the Routine activity theory	
	which suggests that crime is more likely	
	to occur when protivated offenders have	
	access to Suitable targets and there are	,
	no copable guardians	
:	For instance in areas where firearms are	
	easily accessible and not adequately regulated	
	disputes or confrontations can escalate into	
	violent crimes more snegrently.	
	Protective factors:	
	The state of the s	
(i)	Strong Family Bonds and Supportive	
	The state of the s	
	According to Malter and Travis Hireli	
	Strong social bonds with family, school	
	and community as protective factors against	
	delinquency. Travis Hoted that inner and	
	quer restraints torm a person's self control.	
	which prevents acting against social prime	
	children who lack this self control then	
	children who lack this self control then	

may grow upto commit crimes	
For instance & Leenager who	
a supportive and nuxturing family	
environment is less likely to engage	
in delinquent behaviour as they have	
pacitive relationships and strong social bonds	
that discourage criminal acts.	
ii Access to Quality Education:	1
Education is a crucial element in	
social control, as it can provide young	
individuals with the unawledge, skills,	
and opportunities to load successful lives	
For instance a child why receives	
quality education in Possistan is more.	
likely to have better future prospects,	
reducing the risk of delinquency as	
they can pursue legitimate paths for	
personal and prokessional growth.	
As Social control theory Suggests that	
active community involvement and support	
can create a sense of belonging and	
attachment to prosocial institutions, acting	1

	as a protective factor against delinquency
	For instance a community in takistan
•	that organizes recreational activities
	mentoring programs, and after school
	initiatives for young people can contribute
	to positive youth development and reduce delinquent behavior.
	being vent berxivios.
iv	Mental Health Services:
	Access to mental health services
	can address underlying psychological
	issues, reducing the risk of delinquency
	associated with untreated mental health
	problems
	For instance a troubled teenager in
	Pakicton who receives counselling and
	Support for their mental health struggles
	may find healthier coping mechanisms
	reducing the likelihood of engaging
	in (viminal cichinhes as a response.
	to their issues.
	Paril: P. A. I
Vi	Positive Peer Associations:
	Social learning theory suggests that
	peer associations can influence individual

1	opt prosocial behaviors and

	A STATE OF THE STA
i Res	vovative Justice Approaches:
120	storative justice tocuses on reporting
bay	m and rehabilitating oftenders encouraging
DYOS	ocial behaviour and reducing recomism
For	instance instead of resorting to

ans is correct and well composed it seems like you took alot of time to write and it is done open books conclude the ans on 8th side max and it seems you too alot of time to write it ans relevance pattern and content is all good and theoretical application is also as perequired in the main exam
8th page max!!! you have max 40 45 mins for one answer
over all satisfactory 10/20
traditional punitive measures, a juvenile
Oftender in Pakiston is engaged in
restorative justice program where they
have to make amends for their
actions and contribute positively to
the community they haved
Conclusion:
Juvenile delinquency in Pakiston is
a multifaceted issue As per Mertons
- Anomie theory explains how societal
pressures and blocked conventional avenues
may lead individuals/juveniles to adopt
deviant means to achieve success However,
protectiver factors as Strong family bond,
quality education, community support and
mental health services act as critical
buffers against delinquency. Conventional Means
