

Precis:

Indent the paragraph.

Total words: 287

the author

According to Author, ~~that~~ there are many superstitions in different states and they are loved to study.

Some assumptions, are looking at new moon is being unlucky and likewise many more.

If they told ~~a~~ scientists about these assumption ~~figures~~ First of all they will ask for evidence and they would not believe on only one case.

They will ask for hundreds. ~~They~~ Apart from these believes or evidences any intelligent person can ask for the reason.

Why Dog howling is related to ^{and gifted} death and is there any powers to dogs or it is just an Assumption.

Words: 96

Title:

→ Any Superstitions needs an Evidence/facts.

→ Scientist would not believe on Superstitions without

Reasons.
Do not include examples in precis. Just give their gist. Grammar and structure need improvement.
