Topic :- Is Pakistan Ready for Digital Revolution?

[margin notes in red: Mashal; Content and writing expression is good; work on outline structure]

1 - Introduction

2 - Crunch paragraph

3 - Pakistan is not ready for digital revolution (Thesis)

a) Pakistani population lacks the necessary education and skills needed to embrace this revolution.

b) Government has been unable of take necessary measures to support a 'Digital Pakistan'

c) Poor digital infrastructure is yet another reason

d) Pakistan's institutions have an obsolete digital architecture

e) Startup culture (which is prerequisite for digital revolution) is not being supported well by our current digital architecture.

4 - The framework already in place is sufficient to kickstart this revolution (Anti-thesis)

a) Covid-19 lockdown period has made people realize the potentials of digitalization and has increased their ability to use digital platforms

[margin note in red: Not readable]

b) _____ has taken several initiatives to promote E-governance

c) Currently available digital infrastructure is sufficient to promote digital revolution.

d) Institutional digital architecture has been greatly improved in the post-covid era.

e) Several initiatives have been taken to promote Startup culture in Pakistan through digitalization.

5- Above mentioned arguments simply highlight the fact that Pakistan is still stuck in a nascent stage in terms of digital readiness (Synthesis)

a) The situation has improved in the past few years but Pakistan still ranks low in terms of public awareness and ability to use digital platforms (compared to other regional countries)

b) Pakistan's E-Governance initiative is in at a nascent stage

c) Digital revolution demands an up-to-date and extensive digital infrastructure

d) Only a few government institutions have attained complete digitalization so far and these facilities are not available to every citizen.

c) Unannounced internet closures and banking delays are the greatest hurdles for tech-based startups in Pakistan

6- Conclusion:
