

Topic

Mankind faces the challenge of using Artificial

Intelligence responsibly.

outline

1 Introduction

Thesis statement: Mankind is facing ~~current~~ ^{addressed} challenges in use of AI? that need to be addressed for its ^{whose?} improvement. Challenges arise from the existing ^{sp} irreversibility in the field of AI. Overcoming these challenges is necessary to ensure the advancement use of AI in the present era.

2 The challenges of using Artificial intelligence.

3

3 what are the challenges ^{ed by} facing mankind by used of Artificial intelligence (AI).

a) Elimination of morality from the mankind → how?

b) Dependence and loss of control

c) Economic inequality from the world

d) Fake content and misinformation

e) Unintended consequences in any field

4 why responsibility is important to using Artificial Intelligence. ^{sp} responsibly

a) Mitigate bias and discrimination

b) To prevent harmful consequences

c) Ethical ^{sp} decision making

d) For long term technological impact -?

e) Safeguarding privacy and data security

f) Shaping a positive system through responsibility.

challenges summarized in thesis are not comprehensively st.

Genetic subpoints

how?

incomplete and generic sub-points

g) Building trust in AI

h) To make the skills useful

5 How can mitigate the challenges caused by using Artificial Intelligence.

a) Education and Public awareness

b) Reasonable development

c) ^{SP} continuous monitoring and auditing

d) Implement strong data privacy
