

## Paragraph Writing

The rise of populism and the opportunist nature of politicians is an important factor behind the upsurge of Islamophobia in the West. The politicians use anti-Islamic approach to gain public support and win elections. For instance, USA President Donald's manifesto in 2016 presidential elections had anti-Muslim elements, such as refusing visa to seven Muslim countries. Similarly, the Indian Prime Minister Narendra Modi won the elections on the same grounds. Therefore, the Muslim world should consider refraining from anti-Islamism as an opportunity for themselves.
