

"So, surely with hardship comes ease."

1. Introduction

Life is like a roller coaster in which humans face hardship with some sort of comfort. There are many hardships for humans in various sectors of life; however, after all these hardships, humans find comfort, and with every hardship, ease comes.

2. Life is a mixture of hardships and comforts.

3. How hardships come with an ease?

a) No pain lasts forever as individuals have a hope for best and a potential to move forward.

b) When one door closes, many doors of opportunities open for a person.

c) With rising poverty and unemployment, Technology is an ease to earn money.

d) Online education is an ease which

comes with natural disasters.

- e) After a long strife for gender equality, women got many legal rights.
- f) Humans find peace in rule and law system, after facing many threats to their security.
- g) Many countries reap the fruit of independence after many hardships.
- h) With the rise of population, youth is an asset in ongoing economic crises.
- i) Nature has bestowed mankind with many resources to shift their reliance upon them, if they face shortage of any of these.
- j) After facing the miseries of autocratic system, humans find an ease in the form of democratic system.
- k) After the hardships of living in stone ages, humans find many sources to communicate around the globe.

l) After WW₂, humans find peace in the established organizational institutions.

m) With the rise of security issues, countries become nuclear powers to which ensures their security.

n) Many great leaders and prophets face difficulties with some ease and comfort.

4. Conclusion

Life is like a roller coaster in which humans face hardships with some sort of ease. There are many hardships for humans in various sectors of life; however, after all these hardships, humans find comfort, and with every hardship, ease comes. Holy Prophet (S.A.W) visited the valley of Taif to invite the people to embrace Islam. However, the people threw stones at him, and he became injured. The angel came and

offered him that he would destroy this valley. Prophet forbade him and said that they would believe me after some time, and his words came true. This story shows that after every hardship, ease comes. Moreover, humans have a potential to move forward because many other opportunities wait when one door of opportunity closes. Humans are struggling to proceed in life and face many hardships in their individual, economical, political spheres of life. However, with these hardships, there are many comforts for humans. Moreover, after these hardships, ease is certain to come.

Life is a mixture of hardships and comforts. Humans live in this temporary world as which is like an examination.

hall. Our Lord is continuously watching us to examine how we tackle all these hardships, and to reward us in hereafter-life. In Quran, it is clearly mentioned that Allah after every hardship, humans will find ease if they believe in Allah Almighty. Moreover, Allah has warned his creature that he will test his mankind by the losses of life, property and children. But, who remains steadfast, he will find the reward of ease and comfort in this life and the life hereafter. Hence, life is a mixture of hardships and comforts.

After every pain, humans find some way out because they have the potential to move forward in their lives. Humans are bestowed with healing power and hope which

proves to be an ease for humans. Moreover, hope is the only thing which saves mankind from destruction. It is an ease which comes out with hardship, and humans proceed to move forward. Emily Dickenson wrote a poem named 'Hope is a Thing with Feathers'. This poem depicts that when humans are going to quite their life, human hope is the thing which saves them and which never dies in humans. Moreover, whenever, humans find difficulties they also know ^{the} their solutions because they are created in their best forms. Hence, no pain remains constant because there is an ease in the form of hope and creativity power of humans.

It is said that when one door ^{of progress} closes for humans, many doors of opportunities

open. Humans come across many opportunities of success, prosperity, employment; however, they can lose them suddenly as life is unpredictable. But, when one opportunity ^{fails} falls to come for individual, many other opportunities come for individuals. For example, USA when Pakistan came into being, it faced many problems. America helped it financially; however, it proved to be a selfish friend. After ~~Soviet~~ the breakdown of Soviet Union, it stopped all the aid. Moreover, it banned all the nuclear equipments which were necessary for Pakistan to become a nuclear power. In this time of hardship, Pakistan looked for another opportunity, and the opportunity came in the face of Russia and China. Hence, when one door of

opportunity closes, many other doors of opportunities open for humans

With the rise of poverty and unemployment, technology is an ease to earn money. Technology is progressing day-by-day, and humans are getting benefit from it. There are many sources to earn money, but at the time of economical crises, technology provides many ways to earn money. There are many websites and sources to earn e.g. freelancing, entrepreneurship, online teaching. According to the report of Pew Research Center, 2021, roughly six-in-ten adults living in household households are earning \$100,000 or more a year. Hence, with the rise of poverty and unemployment, technology comes as an ease to earn money.

Online education is an ease for humans whenever they encounter any natural disaster. Natural disasters are unpredictable and ^{they} are coming after the short intervals due to climate change. However, humans shift their education system from face-to-face interaction to online education whenever they face storms, floods or famine. For example, in 2018, two powerful storms hit the same areas in North Carolina, and schools were closed. They shifted to online education system during this disaster. Moreover, with the advent of corona virus, many countries shifted towards online education system. Hence, online education system proved to be an ease for humans during the natural disasters.

After a long strife for gender equality women got many legal rights. Women were considered inferior to men, and male members enjoyed many opportunities which were not given to females. Hence, the feminist movement started from 18th century - fighting for gender equality. In 1792, Mary Wollstonecraft was the British writer who penned down a book named as 'A Vindication of the Rights of Woman'. Consequently, many waves of feminism took place which were fighting for women's legal rights.

As a result, many legal rights were provided to women e.g. right to vote, educational opportunities and protection against workplace discrimination. Hence, after a long era of hardships and difficulties, women find an ease in legal protection of their rights.

Humans ^{get} find peace and comfort after facing many threats to their security. Humans are naturally conscious about the security of their life and property; which ~~was~~ ^{were} not protected in the state of nature. According to a renowned philosopher Hobbes, human nature ~~is~~ ^{was} brutish and they ~~they~~ ^{were} are continuously at war, before the advent of legal system. Moreover, legal system has protected many rights of humans and make their life more facile to progress in their life. For example, in the constitution of Pakistan, everybody has the right to own property and to live freely. Likewise, a person will be punished if he tries to snatch another's right. Hence, legal system created an ease for humans after they live a life full of difficulties.

Many countries reap the fruit of independence after many hardships and struggles. After war, many countries, ^{who} were colonized, started their struggle to get their freedom. It was the goal of wealthy nations to extend their influence around the globe, and as a result colonialism and imperialism were very common to increase ^{one's} hegemony. However, people came to know their right to independence and they started struggle to get their independence. For example, Pakistan got independence after sacrificing their lives, property, wealth in order to materialize their dream of independence. Moreover, they find a land in which they can live according to their ideology without any kind of suppression. Hence, countries got independence after spending a life of savagery and oppression.

Nature has bestowed mankind with many resources to shift their reliance upon them, if they face shortage of any of these. Humans have massive resources of oil, coal, gas, ~~win~~ water and many other resources. However, some resources are degrading or are not in their use because of human's negligibility. For example, Russia and Ukraine were the largest exporters of oil and food. However, after Russia Ukraine war, USA has imposed many sanctions upon them to restrict their trade. As a result, many countries forced to find the alternative as the prices of oil became exorbitant. For example, amid these crises, Pakistan has shifted its focus to non-renewable energy resources e.g. hydel power, wind energy, solar energy etc. Hence, in difficulties,

humans have many other resources
to find their ease of usage.

With the rise of population,
youth is an asset in an ongoing
economic crises. World is facing
the worst economic crises where
people have nothing to fill their
stomach, and with the rise of
population, the situation becomes
exaggerated. However, amid these
crises, humans have many blessings
and opportunities which can help them
to tackle the situation. Youth is
among the blessings. The power of
youth lies in ^{discovering} the new ways of
employment, new and progressive
ideas, and ^{strengthen economy} adopting of technical measures to
According to a report of United
Nations, the youth comprises of 1.2
billion people in a world. So, they
can lift the world by their progressive

ideas if they acknowledge their strength. As Quaid-e-Azam, the great leader, had appreciated the strength and power of youth in every thick and thin. Hence, youth is an ease amid the growing economical crises because of growing population.

After facing the miseries of autocratic system, humans get an ease in the form of democratic system. In ancient times humans were ruled by autocratic system in which one ruler had an absolute power over others, which was against their liberty. Humans started fight to get their liberal rights, as it was prominent in French revolution. Moreover, Jeanian revolution overthrew autocratic system, and adopted democratic system. According to J.S Mill, the

great philosopher, welfare of humanity is only possible in a democratic government. However, after all the struggles, humans were succeeded in bringing democratic rule in many countries. Democratic rule is like a comfort for humans as it ensures the greatest happiness of the greatest number. Hence,

After the hardships of living in stone ages, humans find many sources to communicate around the globe. With the advent of technology and social media, humans get more connected with the fellow-beings. In stone ages, humans were living in alienated with each other which was a major hindrance in their progress. However, Technology comes as an ease for humans. Social media provides many apps e.g Facebook

Whatsapp, Twitter and snapchat which are the sources to communicate via ^{texts} messages, calls and audio-messages.

According to a report, of these are 3.3 billion internet users worldwide which amounted to 65.7% of population and 61.4% of world's population which use social media (Statista, Worldwide digital population, 2023). Hence, after facing many difficulties to communicate, humans find comfort in the form of technology.

After World War 2, humans found peace with the advent of international organizations. Humans were completely disappointed after facing the brutalities and hardships of world wars. However, the ray of hope appeared when international organizations came into being. These organizations not only ensure the safety of their

lives but also the security of socio-economic progress. For example, United Nations is an international organization founded in 1945 after the second world war. It is committed to ensure peace and security, and it is also promoting social progress. India and Pakistan are two rival countries who engaged in three wars after their independence. Nevertheless, after United Nations resolution, they were forced to ceasefire. As a result, humanity is saved from the miseries of life war. Hence, when humanity was at the verge of destruction, ease came in the form of international organizations.

With the rise of security issues, the countries become nuclear powers which ensures their security when countries faced threats from

other countries, they were forced to possess nuclear weapons as a peace program. Because of the possession of these nuclear weapons, they find comfort. For example, Pakistan became a nuclear power in 1998, after facing a continuous threat from India. As Zulfikar Ali Bhutto said, "we will eat grass, even go hungry, but will get one of our own (atom bomb)--- we have no other choice". After all these hardships, Pakistan secured its nuclear technology, which came as an ease to ensure its security. Hence, ease comes in the possession of nuclear technology which restricts other countries to attack their rival countries.

Many great leaders and prophets face difficulties, but after

all these hardships, ease came. Many great people struggle in their life to achieve their goal, but finally they succeed to achieve their ambitions. History is replete with many such leaders. If people look onto the life of Holy Prophet (S.A.W), they find that he faced many hardships and difficulties. However, after all the struggles, he succeeded in to spread the teachings of Islam. Qaid-e-Azam was the leader who fought well to get separate land for Muslim community in Indian sub-continent. But, he all succeeded in to achieve his goal. Moreover, Nelson Mandela spent many years in prison, but after that he became the president of South Africa. Hence, ease and comfort come after many hardships and difficulties.

In a nutshell, ease comes after hardships. As P. B. Shelley wrote a poem named 'Ode to the West Wind', in which he said, "If winter comes, can spring be far behind?" It means that, after every hardship, good time is inevitable to come. Individuals face many hardships in their life. Humanity faces many hardships in the form of natural disasters, poverty, unemployment, economic instability, political crises, and security issues. However, all these hardships come with some comfort and ease e.g. technology, youth and natural resources. Moreover, after all these hardships, ease comes as it can be seen a blessing. No pain lasts longer; no hardship is forever; no calamity stays longer. There are always new opportunities and blessings to count on.
