The control use of technology is use as a tool to combat against cyber bullying.

5. Social media serve as a model to shift the global arena.

Technology has been less negative impact on Israel's economy.

Technology is an efficient tool to raise a voice against geno

People have become overly dependent on technology.

Any sufficiently advanced technology is equivalent to Magic. (Sir Arthur Clarke)

The rapid rise of technology is look like a magic. There are many problems that solve easily by technology. Any problems that are linked with mathematics, science and social science are ^{being} solved in a few second. It resembles with the sparkling light of the magic. With the rise of technology, people have become overly dependent on it. It create as a mode of communication and easiness in their life. The peoples do not want to get out from the comfort zone, they want everything happen in a few second. That is why, they have become overly depend on technology.

The problems of people are solving easily by the use of technology. It is an efficient source of e-learning and employment. Digital remittance has boosted the economy of.

Pakistan. Technology serves as an efficient tool of power to shift the global arena. Despite of all the advantages of technology, it has some negative role in our society. The mental abilities are retarded by the use of technology. The online education has limited the lessons from education. There are also some technological problems via online learning. The culture of dependency on technology has been developing. However, the use of technology is in the hands of a person. The education is accessible in anywhere in the world. However, the technology has more positive effect than negative. People have overly depend on technology, it is solving problem so easily. The everyday life problem is solving easily. Social media bring easiness in their life by solving their problems. If a person has Fever. He does not go to a doctor for their checkup. He is easily get their check up online through zoom app. For example, WHO aware about any kind of health of health

Issue. One doctor is not sufficient for all humanity. But a billion of AI is present in that era. They create more awareness about issues in a few second. All the people know very well by the help of AI. Because, AI has more connectivity and adaptability. (Source: 21 lessons for 21st century by Yuval Noah Harari).

However, it becomes an efficient of e-learning. The students are easily learn anything about their studies.

There are multiple types of Flowchart are present on internet about any topic. For example, a different type of e-books are present on website. Youtube serves as a best tool to learn anything. The knowledge of medicine, physics and social science are present on a huge amount on channels of Youtube.

In a nutshell, the learning is being easily through social media. Technology has more benefited other than communication. It has great impact on the economy.

Digital remittance has boosted the economy of Pakistan. Digital and mobile based remittance has increased the foreign investment of Pakistan.

The digital remittance has served as a buffer against external shocks, instable economy and societal problems. For example, Pakistan ranked at 5th number globally increased remittance from digital and mobile-base remittance (World Bank). It has a good impact on Pakistan GDP. However, the growth of GDP of Pakistan has increased through digital remittance.

Despite of their effect on economy, it becomes a source of employment. People. Some type of people are not wanting to go out of ^{their} homes for job. People are starting their online business on social media. The peoples are being earned money to efficient their life style. For example, an efficient amount of money are being earned through Amazon. The process

of delocalization occurs through online business. It becomes an efficient source of incomes for all kinds of people.

Social media serves as a tool for the paradigm shift of global arena. In the international system, the social media imparts an efficient effect on the state. For example, a recently campaign of BDS (Boycott, Divestment and Sanctions) Palestinians led movement on the social medial adversely effect on Israel's economy. The confidence of stakeholders and investors are decreased due to this economy. If a confidence once decreased, it takes a lot of time to get back on their original position. The same type of event was happened in the 2005. A Danish newspaper ~~made~~ ^{made a} controversial cartoons. These cartoons was banned. A Danish paper was took two year to build their reputation in the Muslim countries.

Despite of their advantages, social medias has created more adverse effect, on mental health. The mental health is very important for the human. It has limited the cognitive abilities of human. The global prevalence of ^{internet} addiction is about 6%. But in some regions of Middle East, the internet addiction is about 11%. The people was faced ADHD symptoms and psychiatric disorder. (Source: PMC (Public Medical Centre: Journal; 2023)). The mental health problems are increased day by day through social media.

Digitilization of education has some kind of negative effect. Physical education is more helpfull for the students. The problems of learning are being solved easily through physical education. According to a reasearch conducted in the Russia, teenagers students faced problems via online learning.

The statistics showed that 71% of student was thought that lack of communication during e-learning. About, 17% student was thought the process of checking problems was biased. There was not equality of checking assessments. There was 13% of student felt that we did not get learn lesson just like in the physical education. (Source: EDP Journal 2021). So, the technology has more loop hole than physical education. Digital remittance has some negative effect on the economy. It creates a culture of dependancy that inhibits the economic growth. The digital remittance has decreased the export. There is a need of sustainable resources of business. In the book of The Prosperity Paradox by Clayton M Christensen, he told about push vs pull method. A Foreign investment was not sufficient to meet the goals of economy. A sustainable type of growth was requisised for the economy.

prosperity.

Cyber bullying is one of the major problem that spread through social media. These are of various kind such as physical threat, text emails and sending message. It affects the mental health of a person. Excess increase of information technology has also nurbered the cyber bullying. Due to these problem, the perturbation has also increased at severe level. According to a UC research in US, youth has faced more problem regarding to Cyber bullying. The 14% of young are facing sexual harassment. These types of problems adversely effect on the mental health. (Source: Pew Research Centre).

Despite of these factor, social media has been less negative impact on Israel's economy. Israel is the major exporter of drones, Spywares and military ammunition. According to a Brookling Institute, these types of boycotts campaign

are less vulnerable to Israel's economy. Because, Israel economy is depend on technology than consumer. All the countries are ready to vote against Israel in the UNSC council. But these countries are not go against Israel. Because, these countries import a lot of military ammunition from them. So, these types of sanctions are not completely destroy the Israel's economy.

The use of technology is in the hands of a person. The correct use of technology creates easiness in the life of a human. A correct time is required for the use of technology. So, the cognitive abilities are not limited by the use of a technology.

Technology will never replace great teachers, but the technology is in the hand of a great teacher will be transformational. (George Couzas). Education is accessible in anywhere in the world through e-learning.

A technology has more positive role in education than negative. It ^{makes} creates education more easy. For example, according to a report of GEM 2023, the users had enrolled in online courses about 220 millions people in 2021. Wikipedia has 240 millions views per day. The daily active users of Duolingo app reached to 20 millions people. In a nutshell, the digitization of education has more positive role in education sector.

Digital remittance has impart a very positive role in the society. Societal problems are being solved easily through digital remittance. The foreign Pakistani send a money in just a money through ACE money transfer. The problems of their family like poverty are being reduced. A PRI (Pakistan remittance initiatives) has taken by Pakistan Ministry of Finance, State Bank of Pakistan and Ministry of Overseas Pakistan. These types of initiatives

have been increased the GDP of Pakistan in the future.

Technology becomes a source of employment. The control use of technology is use as a tool to combat against cyber bullying. Social media apps such as Instagram, Twitter, Facebook and Tik Tok becomes a sources of employment. These apps offer free monetization branding to organization. A lot of candidates are taking participate in organizations. So, the organization earn money as well as well as branding.

Technology is an efficient tool to raise a voice against genocide. The people conducted a plebiscite for genocide. These types of campaign have adversely effect on Israel's economy. It loses the confidence of stakeholders and investor. The satisfaction of consumer and labour is crucial to uphold the production of services and distribution prices. If ones of these are unhappy, it have

created negative impact. (Source: The Market For Virtue by David Vogel).

Technology is very important in the 21st century. It becomes a source of communication and easiness. A problems are being salved easily just in Few seconds. The purpose of technology is to delevier up-to-date knowledge about global arena. The use of technmalogy is in the hands of a human. But it has more positive role in the humanity. The technology is spreading like a light of candle. The emerging light that we get From technmalogy is very helpFul. In the nutshell, people have become more up-to-date about any diverse topic due to technmalogy.
