— 1 — 1 — 35

VIII. Concluding Remarks: True, climate change is severely affecting humanity, so it is a humanitarian crisis.

Essay:

Recent heavy rains have triggered flash floods and wreaked havoc across much of Pakistan, more than 33 million people were impacted 90 districts hit and an estimated 8 million people were displaced.

As of 18 November 2022, the Pakistan National Disaster Management Authority reported that over 1700 people having lost their lives and at least 12,867 people injured.

Similarly, In Bangladesh more than half of people were deluged by devastated floods, leaving country on the verge of climate crisis.

These above statements showing that climate change is the worst form

of human suffering and how severely it has impacted the life of common man in Pakistan and Bangladesh. Hence, it is not wrong to say that climate change is real threat to humanity.

If climate change is remains constant, will human be survived on this planet? Is government taking any steps to prevent climate change? Although some skeptics views that climate change is a fake science, so how it can create humanitarian crisis, As a matter of fact, displacement of people, health issues, and loss of property, life are some points manifest that climate change is a humanitarian crisis.
