

# Art of Effective Socialization

In this paragraph, author is referring to "art of effective social interdependence". According to him, we may interact with others on the basis of personality suits, but it will only hinder our natural conduct, which would be hidden under our surface self. There is a general saying - you have to live yourself before you live others.

It means "interdependence comes from self-independence".

In order to sustain, effective interdependence, our actions and words must be coming from our natural inner self. If our conduct is

based on relation techniques then the relationship will be superficial. Hence, self independence is necessary for genuine social interaction. The journey of self-independence starts from recognition of our own character - only then our life will be organised around value-driven principles and integrity.

(2)

What justification does the author claim for his belief in scientific method?

According to author, scientific method is more reliable and accurate than other traditional methods. As it provides the complete truth which is backed

by facts and evidences. Moreover, scientific method allows evidence to be published publicly so the other workers may ~~may~~ assist in their conclusions and logical interpretations.

(3)

Do you gather --- that conclusions reached by the scientific method should be considered final? --

Though scientific method is reliable but on some circumstances data demands different type of conclusion. So, it is quite possible that along with scientific objectivity, we may have to use our own intuition or human subjectivity. In short, it all depends on the event.

(4)

In what circumstances, according to the author,

Is it necessary to abandon the sci method?

On various occasions, scientific method is not effectively applicable. For instance, in our daily life we must arrive at the immediate conclusion without any "slow testing or frequent suspension of judgement". Such type of occasions are a significant part and parcel of our lives and only needs intuitive judgement.

(5)

How does the basis of "Intuitive judgement" differ from scientific decision?

Intuitive judgements are slowly getting irrelevant due to the advent of scientific era. But there are times, when we are not certain or may have to reach at immediate action. In these situations, intuitive

Judgements <sup>absolute</sup> can help us in dealing with truth. In fact, unlike scientific or rigid calculations, intuitive judgements acts on nobler hypothesis.

Moreover, intuitive judgements deals with other type of realities; pre-eminently moral and spiritual realities.

1- Give the meaning of the underlined phrases as they are used in the passage?

- i- The nobler - Nobler hypothesis are Hypothesis a form of our belief system, which can help in reaching real or absolute truth.
