

The Elections are going to be on track. The ECP has ~~un~~ revealed the election schedule.

Some of the political leaders also placed hurdles ~~for~~ ~~not~~ ~~at~~ a path of elections. The Supreme Court of Pakistan suspended the challenging petition of PTI against hiring of bureaucrats as return officers at different constituencies along the country. Some of the political leaders also wanted to delay the elections as they proposed the grounds of harsh weather conditions and raised terrorists attack across the country. But providing a terror free atmosphere for elections at different constituencies is the responsibility of state.

Now, the government which will be formed as post elections results

has a huge responsibility of reforming the economic conditions of country. They should develop policies to control the growing inflation across the country because several times Pakistan and IMF<sup>got</sup> ditched in light of reforming of the economic conditions and policies.
