

Climate influences human life profoundly. Different seasons have different impacts on human being.

According to author, it is completely impossible to survive in intense

cold or severe cold freezer

everything. On the other hand,

hot climate provides little energy

to do work. Those people living

in moderate cold weather, have

to work hard for their

survival. They need home and

thick clothes to keep themselves

warm. People living in cold

areas need health food for

nourishment. In contrast to this,

inhabitants of tropical region

need little effort for their

survival. They can spend whole

day under the shady trees

and need some food for

nourishment. According to author

these differences between tropical

Educational Analysts are more concerned about not interfering with children, rather than enjoying their company. If a person take advantage of company of children and loves them, children will respond to that person in good way. children do not want to be used in social gain. If a teacher has these qualities. He can be successful in his profession. Most of the teachers have to over work. This creates trouble. According to writer, education should not be adopted as full profession. Teaching should be adopted by those, who are mostly stay away from children. They should teach maximum two hours a day. In this way, teachers would not fatigued. children will get affection. Love and affection are best tactics for children.

Manto's ^{writing} has faced much criticism by libelers. He was labelled as vulgar writer. But this did not stop him. He remained firm in exposing the actual facts ~~that?~~ of life. He tried to resolve the secret of sex clearly. He shown sympathy towards pimps & prostitute. He believed that man is mixture of good and bad. His characters behaved like human being and never pretended to be virtuous. He was realist writer and never had biased view of human's faults. He carefully mirrored vulgarity and his readers find harmony in writing on critical issues.
