

Outline + Introduction.

Title:

Do we really need literature in our lives?

1- Introduction.

The need of literature in our lives cuts both ways. Literature is necessary for individuals. It acts as a vehicle for bridging the gap between individuals and the society. However, it is the individuals' own discretion to whether or not depend on it.

2- Crunch Paragraph

3- We need literature in our lives. **(Thesis)**

a) Literature is a vehicle for bridging individual and society.

b) Literature is required for personality development and reflection.

c) Culture and identities are preserved through literature.

d) Literature is essential for understanding human experiences.

e) Literature develops critical thinking.

4- We do not necessarily need literature in our lives. **(Anti-thesis)**

a) Past events are not a must for bridging gap between individual and society.

b) Dependency of individuals on literature.

c) Cultural literature is a hindrance for globalization.

d) Human experiences are better understood through interactions.

e) Critical thinking is something, not directly linked with literature.

4. Literature in human lives cuts both ways. **(Synthesis)**

a) Literature enables man to understand his behavior in society.

b) It is the individual's own discretion to depend on it or not.

c) Cultural values are recognized through globalization.

d) Literature is not binding for an individual for development and reflection.

e) Although, literature is not the only source but is beneficial for critical thinking.

5- Conclusion.

Introduction:

"Ultimately literature is nothing but Carpentry. With both you are working with reality, a material just as hard as wood. (Gabriel Garcia Marquez)

Literature acts as a framework for individual guidance. The need of literature in our lives cuts both ways. Literature is necessary for individuals.

It acts as a vehicle for bridging the individuals and society.

However it's the individual's own discretion to whether or not depend on literature. For personality

development and reflection literature is an important aspect. Cultural identities along with human experiences set a track for individuals to follow and develop the ability to critically think. However, there

are also some negative aspects on human beings like ignoring the self capability of analysing and rationalizing things, making him dependent on literature for development and cultural practices.

But, literature is not binding on an individual for development and reflection.

Topic: Imbalance of Energy mix in Pakistan and its Consequences

1) Introduction:

Pakistan's energy imbalance has grave consequences. The over reliance of Pakistan on conventional energy sources is one of the many reasons for this imbalance. However, if provided with proper way out these consequences can be curbed.

2) Crunch Paragraph

3) Imbalance of energy mix in Pakistan:

- a. - Over reliance on conventional energy sources:
- b. - Insufficient diversification of renewable energy options:
- c. - Skewed distribution of energy sources:
- d. - Lack of technologic integration for renewable options.
- e. - Weak economic system for renewable energy sources
- f. - Corruption and lack of transparency
- g. - Fluctuation in global economic conditions.

4) Consequences of Energy imbalance in Pakistan.

- a- Persistent issue of energy shortages and loadshedding
- b- ~~an~~ Inadequate Capacity of the energy grid
- c- Disturbed Daily life of masses
- d- Hinderance in economic activities
- e- Problem in industrial productivity
- f- Environmental impact of energy imbalance
- g- Social consequences.

5) Possible remedies for energy imbalance in Pakistan:

- a- Encouraging investments in renewable energy resources.
- b- Use of energy efficient technology
- c- International collaboration for technology transfer.
- d- Incentives for diversification of energy sector
- e- Promotion of sustainable practices.

6) Conclusion:

1) Introduction:

According to Ban Ki Moon, Energy is the golden thread that ties together economic growth, increased social equity, and an environment that allows the world to thrive. Sadly, for Pakistan, it has become a myriad challenge. The imbalance of energy mix in Pakistan is characterized by the over reliance on conventional sources of energy, making it problematic to adapt to modern means of energy. The insufficient and skewed distribution of energy sources add fuel to the fire of already worse energy imbalance. The government which should be tackling the problem, sometimes gets involved in worsening the issue through flawed practices like corruption. Fluctuations in global economic conditions also affect Pakistan's energy imbalance. The energy imbalance of Pakistan has grave consequences. The over reliance of Pakistan on conventional energy sources is one of the many reasons for this imbalance. However, if provided with proper way out these consequences can be curbed.
