

Title: Blessings and curses of Science  
Science has made life ~~was~~ comfortable and helped to get rid of many illness of body. • Owing to invention of science serious diseases are curable.

~~Existing to innovations~~

Humanbeings are getting advantages from earth and have been able to prevent famine. Science has made easier providing a quick relief to those who are facing a shortage of food at different places. Science has changed method of war. People fought against each other with stones, sticks and axes some centuries back but now situation is different. One machine

Gun or bomb can kill and  
injure thousands of people  
within a minute. Scientists  
who invented these weapons  
they were not bad. Unfortun-  
ately human beings used them  
wrongly.
