

The Essay Brain Drain: Ill's and Consequences

Hifsa Mumtaz
Essay Intro Assign

In 1963, the term Brain Drain was introduced by the British Royal Society to define the scientists and technologists from UK who migrated from the UK to North America and Canada. It is a widespread phenomena these days. South Asian countries experiences a tremendous amount of emigration of talent. Gulf countries are a particularly favourite work location for many South Asians. Moreover, other favourite work locations for South Asians include Canada, United States, United Kingdom and Australia. Pakistan is currently facing a worrying trend of mass emigration and this trend is continuously rising year after year. A record-breaking 800,000 Pakistanis left the country in the first half of 2023, with atleast 100,000 of them being highly skilled professionals, including doctors, nurses, engineers, IT experts and accountants. A variety of causes are responsible for such a large number of people leaving the country. which includes mostly economic opportunities, educational, healthcare, political and social opportunities in the developed countries. As a result, which badly impact the countries economy, education and healthcare sectors.
