

# A sustainable world : A far cry

## Outline

### 1. Introduction

Thesis statement: No doubt, a sustainable world is a far cry reality. Several factors, including economic inequality, tremendous debt, trade restrictions etc are substantive evidences of it. However, rational measures will definitely promote a sustainable world order.

### 2. Understanding the notion of 'sustainable world'

### 3. Factors proving 'a sustainable world as a far cry'

- a) Widening income and wealth inequality between countries
- b) Mounting public and foreign debt on countries
- c) Imposition of trade restrictions and tariff barriers on rival countries
- d) Global health challenges as pandemic era
- e) Massive environmental challenges at global stage
- f) Rising heatwaves and temperature in the world

### 4. Implications of a far cry sustainable world

- a) Prevalance of social unrest and economic inequality
- b) Domestic financial crisis in developing world
- c) Disruption of global supply chain

- d) Hindrance in economic inter-dependence of the international community
  - e) Natural habitat devastation causing disasters across the globe
  - f) Severe food insecurity and food catastrophe
5. Methodologies to promote a sustainable world order.
- a) Strengthen role of the international organizations
  - b) Foster economic inter-dependence between countries
  - c) Remove trade barriers for global supply chain
  - d) Cooperate and collaborate on environmental policies
  - e) Engage in diplomatic effort: Bilateral and Multi-lateral
  - f) Preserve forestation and natural habitat around the world

## 6. Conclusion

### Attention Grabber

"In globalized world, historically and geo-graphically countries are in tug of tension competing in the international market" (Thomas Friedman, The World is flat, 2005). As per opinion by Thomas Friedman, the world is moving towards tug of competition which particularly is a clear demonstration of a sustainable world as a far cry reality.
