LACK OF AWARENESS

- Lack of resources
- Misguidance of youngsters
- Unemployment

INTRODUCTION

What if brain gain ratio increases instead of brain drain? Developing countries will give tough competition to developed countries overnightly. People from developed countries start taking interest by their own to invest, to start business, and to share their interest with developing countries. New technology invented by developing countries and developed countries are the biggest customer of the developing countries. But if developing countries want a brain gain they should put extra efforts to stop the brain drain. It is possible for our young people to stay in their own country and build a life in their native land. Pakistan is one of the countries which is suffering from brain drain. The biggest causes of brain drain are the lack of opportunities for the people. Unemployment which causes drastic consequences that is faced by a country. Migration consequences are loss of talent/ loss of manpower. Impact on health care system and losing achievements in sports. Brain drain let the increase in number of uneducated people which leads to poor management of country. Reversing brain drain should be key priority for us. If active measures should not be taken soon then the biggest threat that a country will face is removing from world's map as an independent state.
