

Topic: Imagination is more important than knowledge.

1. Introduction

While imagination and knowledge are intertwined in contributing to the success of sapiens as a species, imagination is superior to knowledge as it is, inter alia, original, potent and unbiased.

2. Aside from their inseparability, imagination has upper hand over knowledge.

3. Potency, originality and freedom of imagination override material, mythical and confined knowledge:

3.1. To learn, one must first learn to unlearn prior stereotypes

3.2. Unbiased power of creating magnum opus is one trademark of imagination

3.3. Ideas are born of mind; and they do not die

3.4. Imagination is limited by knowledge

3.5. Revolutionaries are inspired by ideals of an equal, inclusive and egalitarian society

3.6. Knowledge, in contrast to imagination, can be corrupted, to be used as propaganda tool.

4. While imagination, it is established, is more important, it nevertheless feeds on the fodder of knowledge.

4.1. Knowledge is inseparable, even desirable, as long as it does not clip the wings of imagination.

4.2. An ignorant and illiterate man cannot invent and inspire with flat conjectures

4.3. Knowledge is handed over from across generations to preserve flame of imagination.

4.4. Knowledge ignites and stimulates curiosity and imagination

5. Conclusion
