

# Classrooms decide the future of the nations.

DATE:     /    /    

Step into a classroom, and you step into the crucible of our nation's destiny - an incubator where minds are molded, dreams take flight, and the architecture of the future are shaped. The decisions made in the classroom hold the key to shaping a future where the echoes of today's discussions resonate through the corridors of power of tomorrow. It is undeniable fact that education play major role in development and prosperity of a nation. "Classrooms" are the basic unit of the education system. classrooms are imparting necessary values and skills in the ~~the~~ students who are holding the future of nation. These values and skills are essential for the national development and mind of masses in order to take the plunge towards progress and the good life of the country. Classrooms promotes harmony, morality, Swarner, cultural rituals, education, knowledge, co-existence, equality and a lot more which eventually are factors of a ~~emerging~~ developed nation. ~~whereas if we see of~~ ~~class~~ and the reality based examples are USA, Japan, Canada, Finland which have progressed by improving their educational system. whereas on the other hand nation's who

DATE: \_\_\_/\_\_\_/\_\_\_

are not improving their classrooms are painting a gloomy picture of their nation which is ultimately leading to welcoming to major and minor crises in their nation. These crises ~~that~~ lead will become major hindrance to mark themselves on the globe. ~~It is~~ ~~There is no denying~~ the fact that classrooms employ a profound ascendancy on sketching the future of nations by determining what knowledge is imparted, fostering diverse approaches and contributing to the fundamental fabric of nation ~~progress~~.  
progress.

Moreover, there are some prerequisite qualities of classrooms that decide the future of nation. As from the days of yore the importance of educators and classrooms in building a nation is evident. In 19<sup>th</sup> century, the spread of educators in many western nations make a significant shift, making classrooms accessible to a broader population. Similarly the 20<sup>th</sup> century also witnessed advancement in educational psychology and technology, shaping modern classrooms for better nation future. Hence the classrooms' pivotal role in shaping the nation is instilled by knowledge.

critical thinking skill and sense of responsibilities in students who in future uplifts their nation.

Correspondingly, classrooms plays an expedient role in promoting harmony in the survival of the nation. ~~Because~~ It is because the <sup>inter</sup> ~~and~~ peace in the nation is can become the pathway for the prosperity of nation. For example collaborative projects and groups ~~can~~ discussions can enable students to analyze different perspective breakdown different ideas to overcome societal divides. This exchange of ideas can contribute to the cohesive and understanding nation. So it can be said that classroom's prudent role in nurturing harmony & establishes nation's enduring peace.

Likewise, classrooms serve a crucial function in sketching a nation both politically and socially. As the nation learns the social and ethical norms in the classrooms and apply these factors in their professional life. For example instance, in Pakistani classrooms the student stands up for teachers as the sign of respect and they remain standing until their teacher grant permission to sit down. As a result they apply

the same sign of respect for their elders and senior citizens of the nation.

In the same way classrooms also aware the students about politics by including successful political events in their syllabus. Justifying this, societies with well educated and politically aware citizen can exhibit greater stability in the nation's development.

As an example, Finland is also marked with one of the best classrooms ever. As their students remain on top to crack any program ~~internationally~~ internationally. In Finland students are granted admission at the age of 7 without any specific uniform till primary level.

Their classrooms provide the midday meal to their student and a fifteen minutes break after every class of forty ~~preceeds~~ minutes. Apart from this there is no concept of home work so that student can enjoy other activities after their school hours. Thus this small state with such an astonishing classrooms - is providing example for other nations that how a nation can be in stable ~~for~~ form by maintaining their classrooms.
