

The West Supremacy in the Imperial World Order

The west reigns supreme; in an imperial world order.

The white supremacy is not just alive and well, but also it posits the forceful brutal acts with their active participation. A genocide in Palestine is on its way and the Imperial west is an active participant in it.

For a genocide to happen, there must be material capabilities, mass support, and concealment provided by supreme powers. Euro-Americans actively showed their support to Israel, by giving them full aid and equipments so that they can cleanse Gaza and colonise it, to occupy it completely.

Moreover, the brutal killing of people in masses and displacement of civilians shows that it is not a nation-state world but an imperial world where the loads are the West powers. They make the rules and turn tables the way they want. As it can be seen how the USA sent the aircrafts to back the Israel and same as the Europe sent naval ships to provide support to Israel. (M.
