Conclusion.

Can Capitalism bring inclusive growth?

Date _____

Day _____

1. Outline

1. Introduction:

Thesis statement:

Capitalism is an economic system believed to have been born in the aftermath of the Industrial revolution. The Capitalist system since its inception has been criticized due to exploitation of working class. To reap inclusive growth from capitalism raises a question of capitalism's ability to offer inclusive growth unless checks and balances aren't ensured on exploitive tendencies of capitalism.

2. Overview Paragraph

3. Why Capitalism unregulated doesn't lead to inclusive growth (Thesis):

(i). The inherent human tendency towards greed.

(ii). Role of societal hierarchies in capitalist exploitation.

(iii). Very limited trickle-down effect in pure capitalism.

(iv). Impedes laborer's ascent to ownership.

(v). Continued exploitation necessary to fuel capitalist structure.

4. Why hands-off capitalism can offer inclusive growth?

(i). The basic needs in a capitalist system is always promised.

(ii). Societal hierarchy ensures the working of economy at large catering to a greater good.

(iii). Capitalism offers a self-regulating system.

(iv). The basic need of economic mobility is

Ensured and promised

(v) Capitalism thrives on voluntary exchange, not inherent exploitation.

Synthesis: Why capitalism needs tweaks?

(i) A system where basic needs of most are promised ~~or~~ whereas greed of most is

(ii) Basic needs of majority doesn't justify greed of owners.

(iii) ~~Modern approach~~ Humane world only possible if equal outcome opportunity provided.

(iv) Government role should be to uplift exploited people no be deaf to their concerns in bargain for economy.

v. A person owning the intellect or resources has no right to bargain the Labourer's blood and sweat for basic provisions.

Conclusion.
