- Lack of motivation

5. Future ahead & possible ways to digitalize judicial system

- Spreading awareness
- Better justice system
- improved living / life / ~~living~~ setting up national policy
- Organize training program

6. Conclusion:

Triple A

"Allah commands justice, the doing of good and liberty of kith & kin, and He forbids all shameful deeds, and injustice & rebellion, He instructs you, that you may receive admonition." Justice is the conformity to moral rightness in action or attitude. The upholding of what is just, especially fair treatment & in accordance with honor, standards or law. When we talk about the justice system of Pakistan we see enormous reasons of justice not being served. For the betterment of justice system of Pakistan we need to come up with a permanent solution or a set of solutions & need to implement them. Digitalization of justice system is a ~~solution~~ way to make the justice system of Pakistan work more effectively. Digitalization of the system help improve the livelihood of citizens by the decreased rate of crime or controlled rate of crime. People can file a complaint or report electronically without getting frustrated and tired by standing in the long long queues just to file a complaint. Digitalization can also speed up the process of sentencing for judge and will make the life of first time offenders or normal offenders easier as for now especially the first time offenders Accused have to wait in the prisons for so long just for their first trial or appearance in court because of the previously pending cases running before them. As it has so much benefits it also has ~~many~~ drawbacks; as the lack of resources and awareness and because

people are so used to the old system they don't even have the motivation to change their system. In order to digitalize the justice system first we have to bring awareness to the people & start implementing new strategies & set up new national policies & to make people understand it better we need to organize workshops, awareness & training programs. In a nutshell, justice system among people is their basic right but sometimes due to enormous reasons justice is not served in general. Digitalization of justice system has many effects on providing justice to people & it also has some negative effects as well.
