برطانیہ میں برمنگھم یونیورسٹی کی ایک تحقیق سے یہ بات سامنے آئی ہے کہ بڑھاپے میں بھی جم جا کر مسلز بنائے جاسکتے ہیں۔ اس سوچ کو صحیح ثابت کرنے کے لیے یونیورسٹی کی ایک ٹیم نے مردوں کے مسلز بنانے کی صلاحیت کا موازنہ کیا۔ انہوں نے 60 سال سے زائد عمر کے افراد کو دو گروپوں میں تقسیم کیا۔ ایک گروپ میں 60 سال سے زائد عمر کے وہ افراد تھے جو 20 سال سے مستقل ہفتے میں کم سے کم دو بار ورزش کرتے تھے اور دوسرے گروپ میں وہ لوگ شامل تھے جو ورزش کرنے کا مستقل کوئی معمول نہیں رکھتے تھے۔

## Translation

A research conducted at Birmingham university England concluded that muscles can be enhanced even in old age by <sup>developed</sup> doing gym. To prove this true, a university team compared muscles enhancing capabilities of men. They divided men of 60 plus years into two groups. A group contained elders of 60 plus age, who used to exercise <sup>continuously</sup> at least twice a week for the past twenty years. And the second group included those elders who did not follow exercise schedule.
