1) Introduction: According to Ban Ki Moon, Energy together economic growth increased saral equity, and an environmentthat allows the world to thrive. Sodly, for Pakistan it has become a myriad Challenge. The imbalance of energy mix in Palkistan is characteristed by the over reliance on conventional sources of energy, making it problematic to adapt to modern means of energy. The insufficient and skewed distribution of energy bources add fuel to the fire of aready worse energy imbalance. The government which should be tackling the problem, sometimes gets involved in workening the issue through placed practices like corruption. Fluctuations and alobal economic conditions also affect Pakistan's energy embalance. The energy imbalance of Pakistan has grave consequences. The over reliance of pakistan an Conventional energy sources is one of the most reasons for this imbalance. However it provided with proper way out these consequences You need to work on attempting abstract topic
