Heads of government attending the London economic summit will have no excuses if they fail to curb the level of arms exports. A new definitive study by the International Monetary Fund, not generally known, for its liberal views, makes it plain that high levels of arms spending in some developing countries have retorted social programmes, economic development projects and the private sector; the latter an issue with which the seven richest market economies can identity.

The IMF, however, pick out 10 consistent offenders among developing countries which spend more than 15 percent of their GDP on the military, they are: Israel, Angola, Oman, Yemen, Jordan, Saudi Arabia, Iraq, Syria, Egypt and Libya. Employing some unusually forceful language the Fund says: High levels of military expenditure certainly led to low growth and domestic economic hardship in some countries by diverting funds from social programmes, economic development projects and the private social sector.

The study poses a couple of other serious problems for the summit. It shows for instance, that military expenditure is very sensitive to financial constraints. Thus, if countries are deprived of resources then they are forced to cut back on armaments.

Questions

- (a) What are the heads of government doing at the summit? (4)
- (b) What are the findings of the new study? (4)
- (c) How does military expenditure affect domestic economy of a country and in what ways? (4)
- (d) What is the relationship between spending and economic growth? (4)
- (e) How military expenditure is related resources? (4)

COMPREHENSION

a- The woold readers gathered at London économic summit to discuss the Pssue of increasing arms exports. There agenda es to seach at the consences to seduce the aons supply to countries. Failure to which countries?? seach at an agreement would be an unexplainincomplete and unclear ans able failure 6 + A new sepost of International Monetary Funds depicts that developing countries att spending motel atoms and weapons. Such an expenditure is coming at the cost of slow ecomonie, social and private sector development 25 tin those countries. c- Highes levels of military spendings cause setabled growth and egonomic problems because the capital, which was to be used is public development, ecomonie development and private sector growth single sentence ans is is used in military spendingsorrect format d. The nighes the spending on militersy weapons, the lowes the economic growth. Hence, these exists on invesse selotion between spending and growth. This is because the capital needed 166 economic goowth es wilized in militately spending e- A resource vich country always enjoys high levels of economic Aseedom. The highes capital available, we move it can be spent on atmaments. and vice vetsa. For Example, Saudi Ababia 8s a resource bich country 30 short write sentence with complete meaning short write sentence with complete meaning
