

() By promoting has mful products Day: MTWTFSS d) (ustomers' profiles are used for targeted dols e) consumers face emotional and financial loss 4) It provides ease to customers to steery away from deceptive advertising a) Helps customers know rebout the product easily b) Customers have to research about the products c) Consumers have to avoid Vaguehargument of advertisement d) It has possitive aspect as it shows the products related to their interest e) laws alse made against the false advertisement 5) Though these receivable evelvestising but inaccusente

Day: MTWITESS ever succeeds is when he tries to do nothin levan Esas Once these was a time when people used to go out and had to Search for Goods which they needed. Deanwhile, the company employees had to go cloor to door to advertise the company's products. Gradually the advertisement stasted getting published Afterwards, the companies used to advertise through vadia transmission and then television and finally reached to online advertising which made the consumors lazy, to sit at home and come to know about the products. However, people have to remember that laziness not only brings ease but also the adversives. For instance, online advertising can quide as well as misquides

Day: MTWTFSS the customers. Though it helps the customers to know about things they are interested but also misleads them giving false information or leaving out important detail It misquicles the customes by using every platform access to the people and also misrepresents and promotes heismful products. Not only this but also uses customers: profile without permission and course emotional and financial loss to the customers. On the other hand, it helps the customers keep acing themselves from aleceptive advertisement. It also helps them to some to know about the product of their interest people have to reseast and avoid the feelse advertising to note to bear the Moss.

Day: MTWTFSS Though it helps the people to make right use of 9t but the inaccuserte advertising Overweigh the accurate ones as the people with lack of Knowledge are not able to practice the Scifety steps. (268) Companies use advestisement to sell out their products, even if they need to misquicle the customers, they do as their ki is earning projet. Advertisements ase of two kindsone is accuse te and other is inaccusete the former is for running the business and guiding enstoness and the latter is for selling defective products by misquiding the custome so theording to Statista figures, 55% of advertising is unline in America, out of which 18% Stands as feelse advertising. This percentage of

MTWTFSS -false advertising causes orittons of losses to the consumos. These fore companies use advertisements as a tool for financial gain on the expense of consumers losses! Online and vertisions misquides the consumers by leaving no platform where people can get vid of it It uses every possible platform to reach the people, like google, Face book, You he be Insteads am, and many more menuhile, people using these accounts, ase compelled to see the advertisements and get altracted to the products even though the products are not the same as advertised. According to Statista figuses. Facebook hous the largest reach of all social media advertising platform in the U.S., with 188,050,000 useds and over 200 million businesses use Instagrames

Day: MITWIFFS 5 advertising platform. These foxe, the misleading advertisements a necess to the people through their most used social medica accounts (104) No need to mention number Not only this, it of words repre sents the facts about the products to misquide customers. 10 exemplify, the seller makes false and untrue statement about the capabilities or characters. tics of the products. Likewise, the selles advertises the products by exaggerating and overstating 00 by expressing unrealistic cettributes of the proclusts An Olay's advestisement showed the model Iwiggy wrinkle-free and the advestisements were retouched Hjundovin and KIIT- These Companies overstated the horsepower of their vehicles, as much as 9.6 percen Hisborne It claimed to ward

Day: MTWTFSS off germs to prevent the flu and colds, but so studies. backed it up. Thesefore, customers get mislead easily by such Kind of phrealistic colvertise ments. \$ 186 Besides this, it also promotes hermful products which make the people Serious consequences. For instance, to bacco products, such as eigasettes, eigass snuff, and Chewing tobacco, which as associated with many type of illness, are advertised whally One of the famous cigarette in Pakistan by the name of Gold Leaf used to be advertised openly but in the 2020, the Ministry of Alational Health Services Regulations and Coordination issued new regulations the banned tobacco advertising,

Day: MTWTFSS promotion sponsorship (IAPS), and tobacco products displayat all points-of-sale (POS) in Pakistan (lobueco Control Caw). Despite this such kind of products ase still advestised online and leading the children to view smoking in a favorable light l'herefore, online advertising is a source of promotingolisadvantageous producte (118) Despite other losses, Enline advestising has negative effects on customers privacy by exploiting their profiles without their concern Like, by using coolnies, unique tracking URLs, tracking Pixels. and other methods, companies can collect data about hour people interact with their advertisement compaigns across the internal. 10 exemplify, sellers through User Iracking gathers

Day: MTWTFSS data that reveals insight into various characteristics of the ules, such as the uses's demographics interests, brand preferences or purchase intentions. Publishess and advertisess can use such tracking of a user over time to generate a profile for the uses to tagget him or her with unique advertising or content. In briefs it uses customers information which is a threat to theil privacy (Eventually, it causes financial as well as emotional loss to the customers as the customers get attracted towards deleterious Products without Knowing theis hidden feets and then order these producte. On receiving they come to know about the quality of the products when they find the difference between the products they received and

Day: MITWITESS the ones were shown in the advestisement Consequently, Customer face emotioned loss as there is a relation of trust between the customers and rellex. Posear shows that upto que. of profexment effectiveness is due to emotional Javry rather than technical knowledge of skills and 95% of purchasing decisions are motivated not by logic but by unconscious unges, the biggest of which semotion (Daniel Goleman, Emotional Intelligence) In short, inacculate advertisements make the people face emotional 1055. (-126) 'On the other hand by using every platform, online advertising helps the customers to know about the products easily Reople sitting anywhere and and any time can be informed about the products without

y: MTWTFSS depending on any specific source Furthermore this facility Saves their time and mone Going few years back, peop had to go shop to shop si search of items they need to which also cost them more time and money but now they ale not need to put more efforts, they can get anything at their doorstep therefore, by looking about its positive side, it does not issitute the customers but facilitates them. (103) Without a about online marketing contains. mislegaling colvertisements as well as but the customers have to research about the products before malcing any order. For instance people have to put a little effort to reaffirm the advertiser's

Day: MTWTFSS efficiency by collecting complete to debout the product Advertisers provide thei customes the facility of exam ining their reliability, like the review option which contains the feedback of the customers. either positive or negative. The new customess can como know about the accuracy of the products as the previous curtomess have shored experiences there. However, and advestisements platform having no review often, simply deades a sense of mistrust a Deview is like attracting trust of the customiss. this simple step makes eary for the customess to Jeaseh about the product quality (128) Though some advertisements promote harmful products but

customers pan avoid such advert isement these are many ways to keep away themselves from the effects of heirmful adver. tisements. Likewise, for the safety of children, the parents should keep check and bollance on their children to keep them auxey from such lained of detrimental products. A Presently, people use skippin ands which they do not find beneficial. As Inter Public Grays figures suggest that 65% of people skip online video ands according to an extensive Study with 12000 U. So, and they do so as foon as they get the chance. (CNBC, Feb, 2017). herefore, people have to show rationalbehavior by skipping such lained of hearmful add. (1) Though using customers?

Date:_ Day: MTWIFSS data without their concern might look unethical but it has positive side by as well. Advertisers use curtomers deeta for the sake of providing them information about the products of their interest. It helps the customer to get access to the products of their needs as sometimes they think about something and that thing appears in front of them According to a Survey 57% Say they would clock on a general ad for a brand they know yersus 70% if it is personalized. Nost consumers 87% believe personalized advertising means unique content based on their previous purchases or shopping behavious and delivered at a time when they are looking to buy a product. Therefore, using

MTWTFSS customess deeta is not invasion of privacy but a lained of providing effective services them. (130) No doubt that customers face loss due to inaccurate ads but the law has been made against the oleraptive ads to stop and penalize the advertisers. This law discourages the deceptive and also compensate the cultomers for their loss. There are the cases where the companies were penalized due to the false claim about their products, one of the example ' among them 18 the energy drink Red Bull. "Red Bull gives you wings" had been the energy drink? slogan for nearly two alreades In 2014, the company agreed to pay out more than \$13 million

Day: MTWTFSS after settling a Us class action fawsuit that accused Red Bull of making false and misleadine advertising claims (Drinks Industry Publication Ben New In short customers have the safety shield in the form of the laws made against inacculate ads. (131) All the assuments given by the supporters of online. advertisements can not over weigh êts negative aspects. Like it is said that by approaching reveral sources, ads create ease for customess to shop but in a real sense it compels them and trap them to buy things which they do not med. Before online ads people used to go market when they needed any. thing but now even they do not need, again they buy a admired by, the way the product

MTWTFSS are represented. To add more, online ands have made the people more materialistic as the ain of vasious advertisements to subtly entice society to puehase products, which could be done by malain unsee needs for them. thus, it shows that online ads trap the bujers to shop unnecessarily. (129) No doubt humans are tational being and have to show rationally to sealch about the procleets before buying, but this solution hers less effects of people with lack of Knowledge. People who have no experience of online purchosing are uneware of the false claims of the advertisers and get trapped easily. It shows that before becoming expert in online puschasing people have to bear loss through aleceptive ads

Day: MTWTFSS As according to a secent Consumer Reports study, 67% of consumers have felt elegersed by an ads. at least once. Therefore, it shows that people will be experienced in online purchasing by bearing loss once. (163) lexitainly, there are advanced options of avoiding and skipping the false ands but there options can be used by educated people who have grip on technology and are concere of the harmful products. However, the illiterate people who have no know ledge of technology can be misquided easily. Like there are ords which have no option to be skipped and the consumers have to watch the ods completely and get trappedeasily The yearson is that they believe in everything as shows in ads about the proclucts-Like of a mana stories and cut the lis to rally

the ads of non verified beauty Day: MTWTFSS soups, weight loss medicines and meny more which are mostly advertised by the celebrities make the people believe in their accusacy. Therefore the advanced options of avoiding adds is not workeable or all. (122) Even though the use of customers' dates without their concern was justified easily by stating that it helps customers to get access to the things they need or are interested in. However, this reason is not enough to give protective shield to the ones who invade the privacy of the customes lo replace, perception of privacy risks outweigh the perception of its benefit as this data can be used by thisd party for vicious matters and also causes the

Day: MTWTFSS sense of mistrust about the seller therefore the act of using customers, data without their concern can not be justified by any reason (102) Although the law is made against the cleer prive ceds and hers been applied in some cases but the misteading geds de not discouraged completly. Likewise, most of the time the customers do not sue against the las, meanwhile, the cases which are tiled, have not been frutful as the companies have not been convicted or got relieved with a plenty amount of fine and those companies with new names start alceiving people again. Lesultantly, Deople use still becoming the victims of false was. As the Federal Iquale Commission (FTC) reported a substantial increase

in complaints related to deeptive Day: MTWTFSS advertising over the part year. Deceptive advertising eases accounted for more than 35% of all consumers complaints received by the FIC. To conclude, the law is insufficient to present the deceptive ads: (125) In a nutshell online endvertising misquicles the people more their it quicles which her negative effects on customas. Like missepresenting the feets about the products and by using customers data for data targeted ads which ultimately cause the losses to the customers. However, these are positive expects as well as regarding online ads which save the customess time and money Moreover, the advanced options for avoiding deceptive ads are celso present
