

Title: Purpose of Education beyond Just Growth.

Currently, three school of thoughts are present regarding liberty in education. There are those who believe in complete freedom and those who believe on have complete check on children. Third school of thought is based on Rousseau philosophy which believes to provide complete freedom to children and accept them to act in good way.

The writer disagrees with this school of thought as it confines purpose of education only to growth not on moral development. To act in civilized way children need to have qualities like humbleness & intelligence which they cannot achieve on their own.

Therefore, Education must be view as ingrain morality and mental development along with growth.
