

Increasing terrorism in Pakistan.

Terrorism has become an unsolved issue in Pakistan from last 3,4 months. Many attacks have been occurred in different regions.

Recently, a bomb blast in a mosque in Peshawar has become a streamline issue. In this incident, more than 59 people have lost their lives and uncountable people were injured.

Due to these attacks a dire need has occurred for the Government and for the military to resolve this issue by their authorities using different mediums. There is a debate in this country about "the bad" or "the good" taliban. According to the authorities these good taliban has suffered a lot due to these attacks. The Civil government made policies but cannot implement these policies due to military. The reason behind this is that the military resolve this issue in their own way.

The need of the hour for both administrations is to solve this issue in a peaceful manner; as Pakistan contains the status of a defending state.
