

Paragraph on

"Democracy and Illiteracy donot Move Together"

A notion that "democracy and illiteracy donot move together" is universally true and practical. In illiterate societies, in past, ~~if~~ ~~th~~ when democracy was introduced, it didnot worked perfectly. Its ~~fruits~~ results were against what was expected from democracy because in illiteracy, the democratic leaders manipulates their subjects. They are kept unaware from the basic rules and benefits of democracy. Presently, if we see the situation of democracy in our country we see that democracy is not flourishing due to illiteracy in our country. On contrary to this, in literate countries, democracy has brought fruits, and citizens of that countries has got thier basic rights. Conclusively, we can say that the societies which are educated then the democray flourishes, while in illiterate societies democracy diminishes.
