

"The global issues of warfare"

The global issues of warfare means when the issues are arisen from different sectors of ~~GOOD ATTEMPT~~ globe. The treaties are broken down, the way of negotiation is cut off and prime focus is given on the full-scale war. Historically, the path of war was taken hurriedly due to absence of diplomatic approach among the Super States. The WWI had made the league of nation with the intention to overcome ahead destruction in the world. The league of nation was formed to follow the path of negotiation and mediation instead of ~~let~~ choosing the path of war. Let the canon decide its a mass destructive way to solve the issue. The globe must avoid this way be promoting table-talks among the States. The socio-economic development should be considered to run the affairs of the globe smoothly. The concept of policy of bile should be avoided by the stake holders, as the politics of bitterness will pour fuel on the fire. Therefore, the harsh times should be avoided

by promoting table talks among
the States. As the time passes
the situation would be uncontrol,
and the mass desubaction would
not be recovered soon. However,
the globalization must include the
cordial and cooperation to the
States. the back up will eliminate
the warfare among the States,
which has the potential to
exhaust the financial, political
and social fabric of the
State. Additionally, the issues arose
but the solution is also present.
to that particular issue. To
conclude fairly the global observing
States must engross the participa-
tion of all the States to
promote the cordial and supportive
mechanism for the development
of the State as well as
the globe. Because globe is
the only place where
oxygen is available and life
is possible otherwise the remaining
planets do not hold this capability
to give life to the people.
Fairness must prevail to halt the
warfare among the nation-States.
