⑤ Conclusion.

Education means the process in which the mentor or tutor guide their students about morality, ethics, and social codes, which are the dire need for every every society so as to run smoothly and acquire the prosperities.

Meaning of education is complex, but the idea is said to be the primary knowledge to be given to every child. It is the education, which dress up the individual with an enormous and obliged robe, which makes the extra ordinary character of the man. The world seems to be a only place for human being, while interaction with other individuals it creates troubles. The education may be divided

③

into two kinds, namely knowledge based education and skill based education. Knowledge based education means to acquire the primary education about ethical codes, while skilled based is the education to teach about the skills of human needs. Education is a lengthy process and the pupil has been processed through many stages since he entered into the educational phase.

As the constitution refers from state to state so same is the case with education

System. The education of Pakistan is made up of primary, secondary, graduate, post graduate, and doctorate levels. The school section deals with the rudimentary and elementary learning while the college level boost up the educational level of the students. The graduation or post graduation means 14/16 years of education, which makes the students to acquire jobs in the public as well as the private sectors of

The State. Pakistan is a federation and the powers are distributed between federal and provincial legislative lists. The 18th Amendment enabled the ~~provinces~~ provinces to do legislation on educational levels up to Secondary education. While the rest of the levels are given to ~~the~~ federal to make up the policies through an institution known as the Higher Education Commission (HEC). The education system of Pakistan has acquired magnificent ingredients, which can alter the systematic education. However, the deficiencies in the enforcement of the educational ~~poli~~ policies have mesmerised the people what to do with it.

As the problem ~~seto~~ revolves around the clock, but there are such factors which can uptick the hurdles in the ~~education~~ education. Such as allocation of insufficient amount for the ~~education~~ education, which can not meet the challenges of it. The financial support plays pivotal

role in the improvement of education. Such ~~is~~ insufficient amount may lead to weak infrastructure. Unfortunately, mostly the Government Schools do not have primary facilities, such as washrooms, classrooms and boundary walls. Which is ~~an~~ alarming sit and the ruling dynasty must solve this conundrum as soon as possible, so as to give growth to the education.

If the system is not going well, so the ~~attentive~~ review will find out the gaps and loopholes, which has stuck ~~the~~ the state into such menaces. The government shall review their policies of allocation of budget and financial assistance to education. The legislative reforms may lead to excellence of education and push it up the standard of education. The prime ~~focus~~ focus of legislative bodies must contain the speedy and swift reforms in the educational policies of the education.

(6)

To sum up the above passage, that without education the success is dream and never be achieved. So the government must focus on the education, so it can lead social, economical and cultural support, and bear fruits. The developed nations attained their development by considering education as one of the greatest and first list in their policies. As Napoleon Bonaparte quotes that "Give me a educated women, I will give an educated generation."
