Jumbo Cabinet

At time when the nation is trying to handle financial issue and federal government announced to increase the number federal cabinet ^{members} 7 to 85 by adding 8 new members, is not giving good message to people (common) that they are working for elite not for common. According to report interior minister said, these new members will work without pay and privilege but this is hard to believe that these member will not lay any burden on national exchequer because the expenses of their offices & other related expenses will borne by state. This addition to cabinet at time when million lost jobs in manufacturing and services industries is not good. Interior minister said the addition were made "to praise them". This addition is like to replicate the step of ^{Punjab} Aslam Raisani. When he formed cabinet of 51 ^{member} from 85 provincial assembly in the least developed province. Instead to add more member to cabinet the administration should have to minimize unnecessary expenses and cut down the size of cabinet to light the burden on ^{economy}. The PDM govt have short time if ^{not} intended due to any accident. The electables and influential with support PML-N in the coming election, the administration have to concentrate on real problem.
